## INTRODUCTION

This document (the "**GUIDELINE**") is to be used as a guideline with regard to the composition, calculation and maintenance of the Solactive Sustainable Development Goals World RC 8 EUR (the "**INDEX**"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE specified in Section 5.5. The INDEX is owned, calculated, administered and published by Solactive AG ("**SOLACTIVE**") assuming the role as administrator (the "**INDEX ADMINISTRATOR**") under the Regulation (EU) 2016/1011 (the "**BENCHMARK REGULATION**" or "**BMR**"). The name "Solactive" is trademarked.

*The text uses defined terms which are formatted with "SMALL CAPS". Such Terms shall have the meaning assigned to them as specified in Section 6 (Definitions).*

The GUIDELINE and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to issuers – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

# 1. INDEX SPECIFICATIONS

## 1.1. SCOPE OF THE INDEX

Category	Description
Asset Class	Equity
Strategy	The Index is designed to track the performance of ESG compliant companies and, at the same time, construct a portfolio which exhibits low volatility and avoids excess sectoral and regional concentration. A volatility control mechanism is added to ensure that the index does not exceed a certain volatility threshold.
Regional Allocation	Europe, North America, Asia Pacific
Rebalancing Frequency	Yearly

## 1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Type	RIC	BBG ticker
Solactive Sustainable Development Goals World RC 8 EUR	DE000SLA2MZ1	EUR	NTR	.SOGOALEU	SOGOALEU Index
Solactive Sustainable Development Goals World EUR Index	DE000SLA2M49	EUR	NTR	.SOGOALWE	SOGOALWE Index

\*NTR means that the Index is calculated as net total return Index as described in the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>

The INDEX is published on the website of the INDEX ADMINISTRATOR ([www.solactive.com](http://www.solactive.com)) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <https://www.solactive.com/news/announcements/>.

### 1.3. INITIAL LEVEL OF THE INDEX

The initial level of the INDEX on the 29/12/2000, the START DATE, is 100. Historical values from the 31/08/2016, the LIVE DATE, will be recorded in accordance with Article 8 of the BMR. Levels of the INDEX published for a period prior to the LIVE DATE have been back-tested.

### 1.4. PRICES AND CALCULATION FREQUENCY

The level of the INDEX is published on each INDEX BUSINESS DAY at 10:50 p.m. CET

The level of the UNDERLYING INDEX is calculated on each CALCULATION DAY from 9:00 a.m. to 10:30 p.m. CET based on the TRADING PRICES on the EXCHANGES on which the INDEX COMPONENTS are listed. TRADING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the current Intercontinental Exchange (ICE) spot foreign exchange rate. Should there be no current TRADING PRICE for an INDEX COMPONENT, the later of: (i) the most recent CLOSING PRICE; or (ii) the last available TRADING PRICE for the preceding TRADING DAY is used in the calculation.

In addition to the intraday calculation a closing level of the UNDERLYING INDEX for each CALCULATION DAY is also calculated. This closing level is based on the CLOSING PRICES for the INDEX COMPONENTS on the respective EXCHANGES on which the INDEX COMPONENTS are listed. The CLOSING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the 04:00 p.m. London time rates provided by WM/Refinitiv (the "WM/Refinitiv Rate"). If there is no 04:00 p.m. London time WM/Refinitiv Rate for the relevant CALCULATION DAY, the last available 04:00 p.m. London time WM/Refinitiv Rate will be used for the closing level calculation.

### 1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by SOLACTIVE

## 2. INDEX SELECTION

On each SELECTION DAY, the INDEX ADMINISTRATOR will revise the composition of the INDEX.

In a first step, the INDEX ADMINISTRATOR determines the INDEX UNIVERSE in accordance with Section 2.1. The INDEX UNIVERSE comprises all those financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS (as specified in Section 2.1) and will constitute a starting pool from which the components of the INDEX will be selected. Based on this INDEX UNIVERSE, the new composition of the INDEX will be determined by applying the rules outlined in Section 2.2.

Each new INDEX COMPONENT will be assigned a weight as described in Section 2.3.

### 2.1. INDEX UNIVERSE REQUIREMENTS

The INDEX UNIVERSE is comprised of all financial instruments which fulfill the below requirements.

(the INDEX UNIVERSE REQUIREMENTS):

The Universe is determined on a quarterly basis, it consists of the World SDG Universe provided by VIGEO EIRIS. The securities for the Universe are selected with respect to certain ESG criteria defined in Section 6

The Universe is determined on an annual basis on the SELECTION DAY in September. It includes those companies that are part of the SELECTION POOL and fulfill the following conditions:

- Companies with a minimum Average Daily Value Traded of at least EUR 10mn over the previous 6 months and the previous month  $\min(ADV_{6m}, ADV_{1m}) > 10mn$ .

The determination of the INDEX UNIVERSE is fully rule-based and the INDEX ADMINISTRATOR cannot make any discretionary decisions.

### 2.2. SELECTION OF THE INDEX COMPONENTS

Based on the INDEX UNIVERSE, the initial composition of the INDEX as well as any selection for an ordinary rebalance is determined on the SELECTION DAY in accordance with the following rules:

On each SELECTION DAY in September, the UNDERLYING INDEX selection is determined following the steps below:

1. Rank the securities from the SELECTION POOL by volatility (using a look back period of 126 days).
2. Choose the 50 stocks with the lowest volatility, under the following constraints:
  - a. Maximum of 25 stocks per GEOGRAPHICAL REGION
  - b. Minimum of 5 stocks per GEOGRAPHICAL REGION

- c. Maximum of 12 stocks per SECTOR.

The selected stocks are given equal weight,  $w_i^{target}$  in the portfolio.

The selection of the INDEX COMPONENTS is fully rule-based and the INDEX ADMINISTRATOR cannot make any discretionary decision.

## 2.3. WEIGHTING OF THE INDEX COMPONENTS

On each REBALANCE DAY the Underlying Index Components with the lowest realized volatilities are selected (under certain constraints). The single steps are described in detail in section 2.1 and section 2.2

On each INDEX BUSINESS DAY, the weighting of the Volatility Target Index is determined as described in section 4.

## 3. REBALANCE

### 3.1. ORDINARY REBALANCE

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1 and 2.2) the INDEX is adjusted on each REBALANCE DAY after CLOSE OF BUSINESS.

This is carried out by implementing the weights as determined on the SELECTION DAY

For more information on the rebalance procedure please refer to the Equity Index Methodology, which is incorporated by reference and available on the Solactive website: <https://www.solactive.com/documents/equity-index-methodology/>.

The INDEX is rebalanced over the REBALANCE PERIOD to downsize rebalance transactions in accordance with the Equity Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

The Index is rebalanced yearly over a ten-day period to ensure that rebalance transactions stay below the AVERAGE DAILY VALUE TRADED. Beginning on the TRADING DAY immediately following the REBALANCE DAY, and continuing over the next nine TRADING DAYS, defined as the REBALANCE PERIOD, the target weights of the constituents of the Index on the  $m^{th}$  day are set as follows:

$$w_i^{target}(t_0 + m) = w_i(t_0) + \frac{m * (w_i^{target} - w_i(t_0))}{M}, 0 < m \leq 10$$

Where

$t_0$  = First REBALANCE DAY

$w_i(t_0)$  = Percentage Weight of security i at the REBALANCE DAY. For the avoidance of doubt, if a security i is not an Underlying Index Component on the REBALANCE DAY,  $w_i(t_0)$  is zero.

$w_i^{target}$  = TARGET WEIGHT of security i after the completion of REBALANCE PERIOD.

$w_i^{target}(t)$  = TARGET WEIGHT of security i after the completion of CALCULATION DAY  $t$ .

$m$  =  $m^{th}$  day of the REBALANCE PERIOD

$M$  = Total number of INDEX BUSINESS DAYS in the REBALANCE PERIOD i.e 10.

The first adjustment will be made in September 2016 based on the Trading Prices of the Underlying Index Components on the First REBALANCE DAY.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DAY on the SOLACTIVE website under the section "Announcement", which is available at <https://www.solactive.com/news/announcements/>

## 3.2. EXTRAORDINARY REBALANCE

The INDEX is not rebalanced extraordinarily

## 4. CALCULATION OF THE INDEX

### 4.1. INDEX FORMULA

The INDEX is calculated as a net total return Index.

The calculation is performed according to the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. The standard index formula stipulates that the level of the INDEX changes based on the change of the prices of its INDEX COMPONENTS taking into account their weight in the INDEX and any currency conversion in case the price of an INDEX COMPONENT is quoted in a currency other than the INDEX CURRENCY

Any dividends or other distributions are reinvested back into the INDEX COMPONENT paying the dividend or other distribution at the opening of the effective date (the so called ex-date) of the payment of such dividend or other distribution.

A more detailed description of the mechanics of the index calculation formula can be found in the Equity Index Methodology under Section 1.2.

### 4.2. ACCURACY

The level of the INDEX will be rounded to 4 decimal places.

### 4.3. ADJUSTMENTS

Under certain circumstances, an adjustment of the INDEX may be necessary between two regular REBALANCE DAYS. Such adjustment has to be made if a corporate action (as specified in Section 4.4 below) in relation of an INDEX COMPONENT occurs. Such adjustment may have to be done in relation to an INDEX COMPONENT and/or may also affect the number of INDEX COMPONENTS and/or the weighting of certain INDEX COMPONENTS and will be made in compliance with the Solactive Equity Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

SOLACTIVE will announce the INDEX adjustment giving a notice period of at least two TRADING DAYS (with respect to the affected INDEX COMPONENT) on the SOLACTIVE website under the Section “Announcements”, which is available at <https://www.solactive.com/news/announcements/>. The INDEX adjustments will be implemented on the effective day specified in the respective notice.

## 4.4. CORPORATE ACTIONS

As part of the INDEX maintenance SOLACTIVE will consider various events – also referred to as corporate actions – which result in an adjustment to the INDEX between two regular REBALANCE DAYS. Such events have a material impact on the price, weighting or overall integrity of INDEX COMPONENTS. Therefore, they need to be accounted for in the calculation of the INDEX. Corporate actions will be implemented from the cum-day to the ex-day of the corporate action, so that the adjustment to the INDEX coincides with the occurrence of the price effect of the respective corporate action.

Adjustments to the INDEX to account for corporate actions will be made in compliance with the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. This document contains for each corporate action a brief definition and specifies the relevant adjustment to the INDEX variables.

While SOLACTIVE aims at creating and maintaining its methodology for treatment of corporate actions as generic and transparent as possible and in line with regulatory requirements, it retains the right in accordance with the Equity Index Methodology to deviate from these standard procedures in case of any unusual or complex corporate action or if such a deviation is made to preserve the comparability and representativeness of the INDEX over time.

SOLACTIVE considers following, but not conclusive, list of corporate actions as relevant for INDEX maintenance:

- > Cash Distributions (e.g. payment of a dividend)
- > Stock distributions (e.g. payment of a dividend in form of additional shares)
- > Stock distributions of another company (e.g. payment of a dividend in form of additional shares of another company (e.g. of a subsidiary))
- > Share splits (company's present shares are divided and therefore multiplied by a given factor)
- > Reverse splits (company's present shares are effectively merged)
- > Capital increases (such as issuing additional shares)
- > Share repurchases (a company offer its shareholders the option to sell their shares to a fixed price)
- > Spin-offs (the company splits its business activities into two or more entities and distributes new equity shares in the created entities to the shareholders of the former entity)
- > Mergers & Acquisitions (transaction in which the ownership of a company (or other business organizations) are transferred or consolidated with other entities, e.g. fusion of two or more separate companies into one entity)
- > Delistings (company's shares are no longer publicly traded at a stock exchange)
- > Nationalization of a company (effective control of a legal entity is taken over by a state)
- > Insolvency

## 4.5. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

## 4.6. MARKET DISRUPTION

In periods of market stress SOLACTIVE calculates its indices following predefined and exhaustive arrangements as described in the Solactive Disruption Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/disruption-policy/>. Such market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. The determination of the INDEX may be limited or impaired at times of illiquid or fragmented markets and market stress.

## 4.7. CALCULATION OF THE VOLATILITY TARGET INDEX

The index value on any INDEX BUSINESS DAY is calculated according to the following formulae:

$$I_t = I_{t-1} * \left( \frac{VT_t^{gross}}{VT_{t-1}^{gross}} - AF * \frac{DC_{t,t-1}}{365} \right)$$

Where:

- $I_t$  = Level of the net version of the VOLATILITY TARGET INDEX on INDEX BUSINESS DAY t
- $DC_{t,t-1}$  = Number of Calendar Days from (and excluding) INDEX BUSINESS DAY t-1 to (and including) INDEX BUSINESS DAY t
- AF = Adjustment factor of 3%
- $VT_t^{gross}$  = The gross version of the VOLATILITY TARGET INDEX as of INDEX BUSINESS DAY t, which is calculated according to the following formulae:

$$VT_t^{gross} = VT_{t-1}^{gross} \left( 1 + Exp_{t-1} * \left( \frac{UI_t}{UI_{t-1}} - 1 \right) + (1 - Exp_{t-1}) * (Libor_{t-1}) * \frac{DC_{t,t-1}}{365} \right)$$

Where:

- $Exp_{t-1}$  = Exposure as of INDEX BUSINESS DAY t-1  
 $UI_t$  = Level of UNDERLYING INDEX as of INDEX BUSINESS DAY t  
 $UI_{t-1}$  = Level of UNDERLYING INDEX as of INDEX BUSINESS DAY t-1  
 $Libor_{t-1}$  = 3 month STIBOR rate as of INDEX BUSINESS DAY t-1  
 $DC_{t,t-1}$  = Number of Calendar Days from (and excluding) INDEX BUSINESS DAY t-1 to (and including) INDEX BUSINESS DAY t  
 $Exp_t$  is adjusted according to the following formula:

$$Exp_t = \min(max\ exposure, \widetilde{Exp}_t)$$

$$\widetilde{Exp}_t = \begin{cases} TE_{t-2} & \text{if } |Exp_{t-1} - TE_{t-2}| > 5\% \\ Exp_{t-1} & \text{else} \end{cases},$$

with  $Exp_0 = \widetilde{Exp}_0 = 1$

$TE_t$  is the target exposure, which is calculated according to

$$TE_t = \frac{target\ vol}{\sigma_t},$$

Where

$max\ exposure = 100\%$

$target\ vol = 8\%$

$\sigma_{t-1}$  calculated according the following formula:

$$\sigma_t = \max(\sigma_t^{20d}, \sigma_t^{60d}).$$

$\sigma_t^{20d}$  and  $\sigma_t^{60d}$  are the 20 day and 60 day annualized realized volatility of the UNDERLYING INDEX. They are calculated as follows:

$$\sigma_t^{nd} = \sqrt{\frac{252}{n-1} \left[ \sum_{i=1}^n \left( \ln \left( \frac{UI_{t-i+1}}{UI_{t-i}} \right) \right)^2 - \frac{1}{n} \left( \sum_{i=1}^n \ln \left( \frac{UI_{t-i+1}}{UI_{t-i}} \right) \right)^2 \right]}, \quad n \in \{20, 60\}.$$

## 5. MISCELLANEOUS

### 5.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX UNIVERSE (if applicable), the selection of the INDEX COMPONENTS (if applicable) or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement.

### 5.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Solactive Methodology Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section "Announcement", which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

### 5.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal and financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

## 5.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt Index methodologies to changing underlying markets (see Section 5.2 “Methodology Review”) in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the index, the index rules, and particularly the selection criteria, can no longer be applied coherently or the index is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of an index is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

## 5.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the “OVERSIGHT COMMITTEE”) is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

## 6. DEFINITIONS

**“AVERAGE DAILY VALUE TRADED”** means, in respect of an INDEX COMPONENT, the sum of DAILY VALUE TRADED over the specified period divided by the number of TRADING DAYS that fall in the specified period.

**“BENCHMARK REGULATION”** shall have the meaning as defined in Section “Introduction”.

**“BMR”** shall have the meaning as defined in Section “Introduction”.

**“CALCULATION DAY”** is every weekday from Monday to Friday

**“CLOSE OF BUSINESS”** is the calculation time of the closing level of the INDEX as outlined in Section 1.4.

The **“CLOSING PRICE”** in respect of an INDEX COMPONENT and a TRADING DAY is a security's final regular-hours TRADING PRICE published by the EXCHANGE and determined in accordance with the EXCHANGE regulations. If the EXCHANGE has no or has not published a CLOSING PRICE in accordance with the EXCHANGE rules for an INDEX COMPONENT, the last TRADING PRICE will be used.

**“DAILY VALUE TRADED”** means, in respect of an INDEX COMPONENT and a TRADING DAY, the product of (i) the CLOSING PRICE of such INDEX COMPONENT and (ii) the volume traded (measured as a number of shares) of such INDEX COMPONENT on the EXCHANGE during such TRADING DAY.

**“ELIGIBLE REBALANCE DAY”** is each day that is a TRADING DAY.

**“EXCHANGE”** is with respect to the INDEX and every INDEX COMPONENT, the respective exchange where the INDEX COMPONENT has its primary listing as determined in accordance with the rules in Section 2. OVERSIGHT COMMITTEE may decide to declare a different stock exchange the “Exchange” for trading reasons, even if the company is only listed there via a STOCK SUBSTITUTE.

The **“FREE FLOAT”** is with regard to each of the securities fulfilling the INDEX COMPONENT REQUIREMENTS on a SELECTION DAY the share class-specific fraction of the total number of shares of such share class issued that are available for trading by market participants and not locked-in by long term holders, as sourced from data vendors.

The **“FREE FLOAT MARKET CAPITALIZATION”** is with regard to each of the securities fulfilling the INDEX COMPONENT REQUIREMENTS on a SELECTION DAY the share class-specific free float market capitalization. It is calculated as the multiplication of the shares outstanding in FREE FLOAT (as sourced from data vendors) with the CLOSING PRICE of the share class as of the respective SELECTION DAY.

**“GEOGRAPHICAL REGION”** is one of the following three classifications: Europe, Asia, and America.

**“GUIDELINE”** shall have the meaning as defined in Section “Introduction”.

**“INDEX”** shall have the meaning as defined in Section “Introduction”.

**“INDEX ADMINISTRATOR”** shall have the meaning as defined in Section “Introduction”.

**“INDEX BUSINESS DAY”** is a day on which all securities which are components of the UNDERLYING INDEX are tradable, i.e. all relevant exchanges are open for trading.

**"INDEX COMPONENT"** is each security reflected in the INDEX.

**"INDEX COMPONENT REQUIREMENTS"** shall have the meaning as defined in Section 2.2.

**"INDEX CURRENCY"** is the currency specified in the column "Currency" in the table in Section 1.2.

**"INDEX UNIVERSE REQUIREMENTS"** shall have the meaning as defined in Section 2.1.

**"INDEX UNIVERSE"** is the sum of all financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS.

**"LIVE DATE"** shall have the meaning as defined in Section 1.3.

**"OVERSIGHT COMMITTEE"** shall have the meaning as defined in Section 5.5.

**"REBALANCE DAY"** is every month on the 25th September each year, If that day is not a TRADING DAY the REBALANCE DAY will be the immediately following TRADING DAY.

**"REBALANCE PERIOD"** is the period starting from (and including) the REBALANCE DAY until and (including) the immediately following 10 TRADING DAYS.

**"SECTOR"** is one of the following ten classifications: Consumer Goods, Industrials, Basic Materials, Oil & Gas, Health Care, Utilities, Consumer Services, Financials, Technology, and Telecommunications

**"SELECTION DAY"** is the CALCULATION DAY which is five CALCULATION DAYS prior to the scheduled REBALANCE DAY

**"SELECTION POOL"** is determined on an annual basis on the SELECTION DAY in September. It includes those companies that are part of the Universe provided by VIGEO EIRIS on a quarterly basis. The securities for the Universe are selected with respect to following ESG criteria :

1. Vigeo Eiris ESG score above the average score per zone of the selection universe, separated into three zones: Europe, North America, Asia Pacific
2. No controversies with critical severity
3. Not listed on the Vigeo Eiris Controversy Warning List
4. If the company is within the top 10 carbon emitters of its sector and has a Vigeo Eiris Carbon Footprint classification of D, then the Vigeo Eiris Energy Transition score must be greater than or equal to 50/100
5. Significant or Major involvement in Vigeo Eiris Sustainable Goods & Services (Access to Information, Capacity Building, Energy & Climate Change, Food & Nutrition, Health, Infrastructure, Responsible Finance, and Water & Sanitation)

Category	Level of incorporation
Major	50% or greater
Significant	20 - 49%

OR

Score equal to or above 60/100 and ranked first among sector peers in the themes of Societal Development, Fair Work, Business Ethics, Corporate Governance, or Natural Resources. When themes are inter-related, the company must also be ranked in the top 10 sector peers on the second theme.

6. No major involvement in Alcohol, Armament, Gambling, Nuclear, Sex Industry or Tobacco

Alcohol

SubCategory	Major involvement
Production of alcoholic beverages	> 0%
Distribution of alcoholic beverages	≥ 10%

Armament

SubCategory	Major involvement
Controversial weapons	> 0%
Other offensive products	> 0%
Defensive & auxiliary military products	≥ 5%

Gambling

SubCategory	Major involvement
Gambling products/services	≥ 5%
Distribution of gambling products/services	≥ 10%

Nuclear

SubCategory	Major involvement
Nuclear-related activities	≥ 5%

## Tobacco

SubCategory	Major involvement
Production of core tobacco products	> 0%
Production of secondary tobacco products	≥ 10%
Distribution of core tobacco products	≥ 10%

## Sex Industry

SubCategory	Major involvement
Production of pornography or sexual services	> 0%
Distribution of pornography	≥10%

**“SOLACTIVE”** shall have the meaning as defined in Section “Introduction”.

**“START DATE”** shall have the meaning as defined in Section 1.3.

**“STOCK SUBSTITUTE”** includes in particular American Depositary Receipts (ADR) and Global Depositary Receipts (GDR).

**“TARGET WEIGHT”** is defined as the weight that will be implemented for an INDEX COMPONENT at the end of the REBALANCE PERIOD.

**“TRADING DAY”** is with respect to an INDEX COMPONENT included in the INDEX at the REBALANCE DAY and every INDEX COMPONENT included in the INDEX at the CALCULATION DAY immediately following the REBALANCE DAY (for clarification: this provision is intended to capture the TRADING DAYS for the securities to be included in the INDEX as new INDEX COMPONENTS with close of trading on the relevant EXCHANGE on the REBALANCE DAY) a day on which the relevant EXCHANGE is open for trading (or a day that would have been such a day if a market disruption had not occurred), excluding days on which trading may be ceased prior to the scheduled EXCHANGE closing time and days on which the EXCHANGE is open for a scheduled shortened period. The INDEX ADMINISTRATOR is ultimately responsible as to whether a certain day is a TRADING DAY.

The **“TRADING PRICE”** in respect of an INDEX COMPONENT and a TRADING DAY is the most recent published price at which the INDEX COMPONENT was traded on the respective EXCHANGE.

**“UNDERLYING INDEX”** is the Solactive Sustainable Development Goals World EUR Index (see 1.2) which is based on the Universe. Its calculation is outlined in chapter 4. In a first step, the Solactive Sustainable Development Goals World EUR Index (the “UNDERLYING INDEX”) is calculated based on the SELECTION POOL. As a second step, the Solactive Sustainable Development Goals World RC 8 EUR Index (the “VOLATILITY TARGET INDEX”) is computed based on the “UNDERLYING INDEX”

"**VIGEO EIRIS**" is a global provider of environmental, social and governance research to investors and corporates. Vigeo Eiris provides research and solutions for sustainable value creation. For more information, please visit: <http://www.vigeo.com/csr-rating-agency/fr/3-1-investisseurs-et-gestionnaires-d-actifs>

The "**VOLATILITY TARGET INDEX**" is calculated based on the UNDERLYING INDEX as outlined in chapter 4.

"**WM/REFINITIV RATE**" shall have the meaning as defined in Section 1.4.

## 7. HISTORY OF INDEX CHANGES

Version	Date	Description
1.0	<i>3 November 2016</i>	Index Guideline creation ( <i>initial version</i> )
2.0	<i>12 June 2023</i>	Change to Solactive Standard calculation from "Guru" Logic
