INDEX GUIDELINE

Introduction

Version 2.0 – 28 February 2023

INTRODUCTION

This document (the "**Guideline**") is to be used as a guideline with regard to the composition, calculation and maintenance of the Solactive Innovative Technologies Index (the "**Index**"). Any amendments to the rules made to the Guideline are approved by the Oversight Committee specified in Section 1.6. The Index is owned, calculated, administered and published by Solactive AG ("**Solactive**") assuming the role as index administrator under the Regulation (EU) 2016/1011 (the "**Benchmark Regulation**" or "**BMR**"). The name "Solactive" is trademarked.

The Index is governed by a published, rules-based methodology and is designed to measure the performance of an investable universe of publicly-traded companies that are involved in innovative and disruptive technological trends across a broad range of industries. The term "disruptive technologies" is generally understood to refer to advances in the technological sector that displaces an established technology or creates a completely new industry (e.g. email displacing letters, mobile phones displacing the telecom industry).

Companies eligible for inclusion in the Index:

(i) will derive assets or revenues from any of the following themes:

1. Blockchain;
2. Cloud Computing;
3. Cyber Security;
4. Future Cars;
5. Genomics;
6. Robotics & Automation;
7. Social Media;
8. Digital Entertainment.

(each an Index Category and together the Index Categories).

This document contains the underlying principles and rules regarding the structure and operation of the Index. Solactive shall make every effort to implement the applicable regulations. Solactive does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the Index nor the Index value at any certain point in time nor in any other respect. The Index is merely calculated and published by Solactive and it strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for Solactive—irrespective of possible obligations to issuers—to advise third parties, including investors and/or financial intermediaries, of any errors in the Index. The publication of the Index by Solactive does not constitute a recommendation for capital investment and does not contain any assurance or opinion of Solactive regarding a possible investment in a financial instrument based on this Index.

INDEX GUIDELINE

Index Specifications

Version 2.0 – 28 February 2023

1 INDEX SPECIFICATIONS

- > The index provides exposure to companies that are involved in innovative and disruptive trends across a broad range of industries.
- > The Index is a Price Return/Net Total Return/Gross Total Return index. For the Price Return Index special cash distributions are reinvested net of cash.
- > The Index is published in US Dollar.

1.1 SHORT NAME AND ISIN

The Index is distributed under the following identifiers:

Name	ISIN	WKN	Characteristic	Reuters	Bloomberg
Solactive Innovative Technologies Index PR	DE000SLA5ZW3	SLA5ZW	Price Return	.SOLITEKP	NA
Solactive Innovative Technologies Index NTR	DE000SLA5ZX1	SLA5ZX	Net Total Return	.SOLITEK	SOLITEK Index
Solactive Innovative Technologies Index TR	DE000SLA5ZY9	SLA5ZY	Total Return	.SOLITEKT	NA

1.2 INITIAL VALUE

The Index is based on 100 at the close of trading on the start date, September 6th, 2013.

1.3 DISTRIBUTION

The INDEX is published on the website of the INDEX ADMINISTRATOR (www.solactive.com) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute/display the Index via its information systems.

1.4 PRICES AND CALCULATION FREQUENCY

The level of the Index is calculated on each Calculation Day from 9:00 a.m. to 10:50 p.m. CET based on the Trading Prices on the Exchanges on which the Index Components are listed. Trading Prices of Index Components not listed in the Index Currency are converted using the current Intercontinental Exchange (ICE) spot foreign exchange rate. Should there be no current Trading Price for an Index Component, the later of: (i) the most recent Closing Price; or (ii) the last available Trading Price for the preceding Trading Day is used in the calculation.

In addition to the intraday calculation a closing level of the Index for each Calculation Day is also calculated. This closing level is based on the Closing Prices for the Index Components on the respective Exchanges on which the Index Components are listed. The Closing Prices of Index Components not listed in the Index Currency are converted using the 04:00 p.m. London time WM Fixing quoted by Reuters. If there is no 04:00 p.m. London time WM Fixing for the relevant Calculation Day, the last available 04:00 p.m. London time WM Fixing will be used for the closing level calculation.

1.5 WEIGHTING

On each Selection each of the Index Categories receives a weight which is equal to 100 per cent divided by the number of Index Categories in the Index. Index Categories are equally weighted, provided that the Index Category has 10-15 companies eligible for inclusion. If for any Index Category less than 10 companies are eligible for inclusion into the Index based on the criteria outlined below, the Index Category receives a total weight of $100 \text{ per cent} / n * (x / 15)$.

Where:

n = Number of Index Categories that are considered as eligible

x = Number of companies per Index Category that pass the criteria outlined below

All exceeding weight is equally distributed among all other Index Categories.

Finally, Index Components within the Index Categories are weighted equally.

1.6 OVERSIGHT

A Committee composed of staff from Solactive (the "Committee" or the "Index Committee") is responsible for decisions regarding the composition of the Index as well as any amendments to the rules.

Members of the Committee can recommend changes to the Guideline and submit them to the Committee for approval.

1.7 PUBLICATION

All specifications and information relevant for calculating the Index are made available on the <http://www.solactive.com> web page and sub-pages.

1.8 HISTORICAL DATA

Historical data will be maintained from the launch of the Index on August 16th 2018.

1.9 LICENSING

Licenses to use the Index as the underlying value for derivative instruments are issued to stock exchanges, banks, financial services providers and investment houses by Solactive.

INDEX GUIDELINE

Composition of the Index

Version 2.0 – 28 February 2023

2 COMPOSITION OF THE INDEX

2.1 SELECTION OF THE INDEX COMPONENTS

The initial composition of the Index as well as any ongoing adjustment are based on the following non-discretionary rules:

On the Selection Days, Solactive defines the Index Universe as outlined in Section 4. All companies in the Index Universe are sorted into one of the following eight Index Categories based on their Industry/membership in an Index as outlined in the following table. The Index Categories are reviewed prior the Selection Day in August on an annual base.

Index Category	Industry/Index
Blockchain	Blockchain Technology Cryptocurrency Mining Cryptocurrency Trading / Exchanges
Cloud Computing	Index Component of the Solactive Cloud Technology Index [.SOLCTEK]
Cyber Security	Carrier Edge Network Management Equipment Customer Premises Network Security Equipment Colocation and Data Center Services Government IT Services Network Security Access Policy Software Network Security Software
Future Cars	Alternative Energy Car Manufacturers Multi-Type Car Manufacturers Auto Interior Comfort/Safety/Electronics Products Fuel Cell Equipment and Technology Providers General Automotive Semiconductors Heavy-Duty and High-End Batteries Manufacturing

	<p>Video Multimedia Semiconductors</p> <p>General Analog and Mixed Signal Semiconductors</p>
Genomics	<p>Hematological Oncology Biopharmaceuticals</p> <p>Other Oncology Biopharmaceuticals</p> <p>Biotechnology and Genomics (GMO/Hybrids) Products</p> <p>Diversified Bioanalytical Instruments</p> <p>Analytical and Bioanalytical Services</p> <p>Bioanalytical Consumables</p> <p>Genetic Molecular Diagnostic Test Kits</p>
Robotics & Automation	<p>Factory Automation Equipment</p> <p>General Semiconductors</p> <p>Industrial Machine Parts and Support Equipment</p> <p>Processor Semiconductors</p> <p>Specialized Semiconductors</p> <p>Programmable Logic and ASIC Semiconductors</p> <p>Household Robot Makers</p> <p>Surgical Robotic Systems</p>
Social Media	<p>Communication and Collaboration Content Sites</p> <p>Web Search Sites and Software</p> <p>Other Classifieds and Directories Media and Sites</p> <p>Mobile Platform Applications Software</p>
Digital Entertainment	<p>Virtual Reality Design and Engineering Software</p> <p>Home and Office Virtual Reality Software</p> <p>Virtual Reality Equipment</p>

	Media Download and Streaming Digital Content Sites Media and Entertainment Industry Software Electronic Gaming Equipment Electronic Gaming/Entertainment Electronics Makers General Gaming Industries General Gaming Products and Services Multi-Type Game Software Online Gaming Systems Online Game Websites and Software Handheld and Smart Phone Games Software
--	--

Initial selection of Companies and sub-industries:

Except for the Index Category Cloud Computing, initially companies and sub-industries are selected using the FactSet Revere Business Industry Classification Systems ("RBICS"). See section 4 of this Document for the list of sub-industries included.

For the Index Category Cloud Computing, potential Index Components must be an Index Component in the Solactive Cloud Technology Index [.SOLCTEK].

The initial list of companies are further refined:

Companies will be evaluated on the criteria outlined below. The evaluation is based on data provided by the DATA PROVIDER.

- UN Global Compact
 - o Companies not in compliance with UN Global Compact principles
- Controversial Weapons
 - o Companies involved in the production development or maintenance of Anti-personnel Mines, Biological or Chemical weapons, Cluster munitions, Depleted uranium, Nuclear Weapons, or any other weapon that violate humanitarian principles through normal use.
 - o Companies that produce or develop key and dedicated components for controversial weapons.
 - o Companies involved in the production and/or services tailor made for the defense industry or the military.
 - o Companies that hold $\geq 20\%$ stake in a company that is involved in controversial weapons.
 - o Companies currently $\geq 50\%$ owned by a company that is involved in controversial weapons.

- Conventional Weapons
 - o >10% revenue from the production or distribution of arms, both public and private
- Tobacco
 - o >5% revenues from tobacco manufacturing.
 - o >5% revenue from tobacco distribution and/or sale of tobacco products.
- Thermal Coal
 - o >10% revenues from the exploration mining or refining of thermal coal.
 - o Companies that base 30% or more of their operations on thermal coal.
 - o Companies that produce >20 million tons of thermal coal annually and are actively expanding.

All companies violating any of the exclusion criteria above are excluded. All companies for which an evaluation of these exclusion criteria is not possible due to insufficient and/or missing information or data are excluded.

For the Index Category Future Cars the selection process of the Index Components is as follows:

From all companies classified in the subindustry "Auto Interior Comfort/Safety/Electronics Products" the five companies with the largest Security-level Market Capitalization are available for inclusion. Next, all other companies in the Index Category and the five selected companies from the "Auto Interior Comfort/Safety/Electronics Products" sub-industry are sorted according to Security-level Market Capitalization and the 15 largest companies are selected as Index Components.

For all other Index Categories, the selection process of the Index Components is as follows:

The Top 15 companies according to the Security-level Market Capitalization are selected as Index Components. If there are less than 15 eligible companies based on the liquidity and size criteria defined below, the Index includes all eligible companies per Index Category. If there are no eligible companies within a certain Index Category, the Index Category receive a zero weight until the next Selection Day.

Companies classified in more than one Index Category, will be replaced by the next following company in the Index Category where they have a lower rank based on Security-level Market Capitalization. If companies have the same rank across multiple Index Categories, the company is kept in the Index Category where it has the larger Security-level Market Capitalization share within the Top 15 and replaced in any other Index Category accordingly.

2.2 ORDINARY ADJUSTMENT

The composition of the Index is adjusted on a semi-annually basis. The composition of the Index is reviewed on the Selection Day and necessary changes are announced.

The first adjustment will be made in August 2018, based on the Trading Prices of the Index Components on the Adjustment Day.

Solactive shall publish any changes made to the Index composition on the Selection Day and consequently with sufficient notice before the Adjustment Day.

2.3 EXTRAORDINARY ADJUSTMENT

An extraordinary adjustment, if applicable, is triggered and applied in compliance with the rules set forth in the [Solactive Guideline for Extraordinary Corporate Actions](#).

INDEX GUIDELINE

Calculation of the Index

Version 2.0 – 28 February 2023

3 CALCULATION OF THE INDEX

3.1 INDEX FORMULA

The Index Value on a Business Day at the relevant time is calculated in accordance with the following formula:

$$Index_t = \sum_{i=1}^n \frac{(x_{i,t} \times p_{i,t} \times f_{i,t})}{D_t}$$

With:

- $x_{i,t}$ = Number of Index Shares of the Index Component i on Trading Day t
- $p_{i,t}$ = Price of Index Component i on Trading Day t
- $f_{i,t}$ = Foreign exchange rate to convert the Price of Index Component i on Trading Day t into the Index Currency
- D_t = Divisor on Trading Day t

The initial Divisor on the Start Date is calculated according to the following formula:

$$D_t = \frac{\sum_{i=1}^n (p_{i,t} \times f_{i,t} \times x_{i,t})}{100}$$

After the close of trading on each Adjustment Day t , the new Divisor is calculated as follows:

$$D_{t+1} = \frac{\sum_{i=1}^n (p_{i,t} \times f_{i,t} \times x_{i,t+1})}{Index_t}$$

This Divisor is valid starting the immediately following Business Day.

3.2 ACCURACY

- > The value of the Index will be rounded to 2 decimal places.
- > Divisors will be rounded to six decimal places.

3.3 ADJUSTMENTS

Indices need to be adjusted for systematic changes in prices once these become effective. This requires the new Number of Index Shares of the affected Index Component and the Divisor to be calculated on an ex-ante basis.

Following the Committee's decision, the Index is adjusted for distributions, capital increases and stock splits.

This procedure ensures that the first ex quote can be properly reflected in the calculation of the Index. This ex-ante procedure assumes the general acceptance of the Index calculation formula as well as open access to the parameter values used. The calculation parameters are provided by the Index Calculator.

3.4 DIVIDENDS AND OTHER DISTRIBUTIONS

Dividend payments and other distributions are included in the Index. They cause an adjustment of the Divisor. The new Divisor is calculated as follows:

$$D_{t+1} = D_t \times \frac{\sum_{i=1}^n (p_{i,t} \times f_{i,t} \times x_{i,t}) - (x_{i,t} \times y_{i,t} \times g_{i,t})}{\sum_{i=1}^n (p_{i,t} \times f_{i,t} \times x_{i,t})}$$

With:

- $x_{i,t}$ = Number of Index Shares of the Index Component i on Trading Day t
- $y_{i,t}$ = Distribution of Index Component i with ex-date $t + 1$ multiplied by the Dividend Correction Factor
- $p_{i,t}$ = Price of Index Component i on Trading Day t
- $f_{i,t}$ = Foreign exchange rate to convert the Price of Index Component i on Trading Day t into the Index Currency
- $g_{i,t}$ = Foreign exchange rate to convert the amount of the distribution of Index Component i on Trading Day t into the Index Currency
- D_t = Divisor on Trading Day t
- D_{t+1} = Divisor on Trading Day $t + 1$

3.5 CORPORATE ACTIONS

3.5.1 Principles

Following the announcement by an issuer of Index Components of the terms and conditions of a corporate action, the Index Calculator determines whether such corporate action has a dilutive, concentrative or similar effect on the price of the respective Index Component.

If this should be the case, the Index Calculator shall make the necessary adjustments that are deemed appropriate in order to take into account the dilutive, concentrative or similar effect and shall determine the date on which this adjustment shall come into effect.

Amongst other things, the Index Calculator can take into account the adjustment made by an Affiliated Exchange as a result of the corporate action with regard to option and futures contracts on the respective share traded on this Affiliated Exchange.

3.5.2 Capital increases

In the case of capital increases with ex-date $t + 1$, the Index is adjusted as follows:

$$x_{i,t+1} = x_{i,t} \times \frac{1 + B}{1}$$

With:

- $x_{i,t}$ = Number of Index Shares of the Index Component i on Trading Day t
 $x_{i,t+1}$ = Number of Index Shares of the Index Component i on Trading Day $t + 1$
 B = Shares received for every share held

$$p_{i,t+1} = \frac{p_{i,t} + s \times B}{1 + B}$$

With:

- $p_{i,t}$ = Price of Index Component i on Trading Day t
 $p_{i,t+1}$ = Hypothetical price of Index Component i on Trading Day $t + 1$
 s = Subscription Price in the Index Component currency
 B = Shares received for every share held

$$D_{t+1} = D_t * \frac{\sum_{i=1}^n (p_{i,t} \times f_{i,t} \times x_{i,t}) + \sum_{i=1}^n [(x_{i,t+1} \times p_{i,t+1} \times f_{i,t}) - (x_{i,t} \times p_{i,t} \times f_{i,t})]}{\sum_{i=1}^n (p_{i,t} \times f_{i,t} \times x_{i,t})}$$

With:

- $x_{i,t}$ = Number of Index Shares of the Index Component i on Trading Day t
 $x_{i,t+1}$ = Number of Index Shares of the Index Component i on Trading Day $t + 1$
 $p_{i,t}$ = Price of Index Component i on Trading Day t
 $p_{i,t+1}$ = Hypothetical price of Index Component i on Trading Day $t + 1$
 $f_{i,t}$ = Foreign exchange rate to convert the Price of Index Component i on Trading Day t into the Index Currency
 D_t = Divisor on Trading Day t
 D_{t+1} = Divisor on Trading Day $t + 1$

3.5.3 Share splits

In the case of share splits with ex-date on Trading Day $t + 1$, it is assumed that the prices change in ratio of the terms of the split. The new Number of Index Shares is calculated as follows:

$$x_{i,t+1} = x_{i,t} \times B$$

With:

- $x_{i,t}$ = Number of Index Shares of the affected Index Component on Trading Day t
 $x_{i,t+1}$ = Number of Index Shares of the affected Index Component on Trading Day $t + 1$
 B = Shares after the share split for every share held before the split

3.5.4 Stock distributions

In the case of stock distributions with ex-date on Trading Day $t + 1$, it is assumed that the prices change according to the terms of the distribution. The new Number of Index Shares is calculated as follows:

$$x_{i,t+1} = x_{i,t} \times (1 + B)$$

With:

$x_{i,t}$ = Number of Index Shares of the Index Component i on Trading Day t

$x_{i,t+1}$ = Number of Index Shares of the Index Component i on Trading Day $t + 1$

B = Shares received for every share held

3.6 MISCELLANEOUS

3.6.1 Recalculation

Solactive makes the greatest possible efforts to accurately calculate and maintain its indices. However, the occurrence of errors in the index determination process cannot be ruled out. In such cases Solactive adheres to its publicly available [Correction Policy](#).

3.6.2 Market Disruption

In periods of market stress Solactive calculates its indices following predefined and exhaustive arrangements set out in its publicly available [Disruption Policy](#).

INDEX GUIDELINE

Definitions

Version 2.0 – 28 February 2023

4 DEFINITIONS

The “**Index Universe**” in respect of a Selection Day are companies that fulfill the following criteria:

1. Listing on a regulated stock exchange in the form of shares tradable for foreign investors without restrictions.
2. Primary listing in one of the countries that are part of the Developed and Emerging Markets as defined by the Solactive Country Classification (see <https://www.solactive.com/documents/>). Stocks which are listed on the Shanghai Stock Exchange or the Shenzhen Stock Exchange must be available to purchase via the Stock Connect.
3. Minimum Security-level Market Capitalization of at least US Dollar 100 million.
4. A minimum Average Daily Value Traded of at least US Dollar 1 million over 1 months and over 6 months prior to and including the Selection Day.
5. For the Index Category Cloud Computing, potential Index Components must be an Index Component in the Solactive Cloud Technology Index [SOLCTEK].
6. For all other Index Categories, companies must be classified under any of the following FactSet Revere Business Industry Classification Systems (“RBICS”) (sub)-industries:

Communication and Collaboration Content Sites, Web Search Sites and Software, Other Classifieds and Directories Media and Sites, Mobile Platform Applications Software, Blockchain Technology, Cryptocurrency Mining, Cryptocurrency Trading / Exchanges, Hematological Oncology Biopharmaceuticals, Other Oncology Biopharmaceuticals, Biotechnology and Genomics (GMO/Hybrids) Products, Diversified Bioanalytical Instruments, Analytical and Bioanalytical Services, Bioanalytical Consumables, Genetic Molecular Diagnostic Test Kits, Factory Automation Equipment, General Semiconductors, Industrial Machine Parts and Support Equipment, Processor Semiconductors, Specialized Semiconductors, Programmable Logic and ASIC Semiconductors, Household Robot Makers, Surgical Robotic Systems, Alternative Energy Car Manufacturers, Multi-Type Car Manufacturers, Auto Interior Comfort/Safety/Electronics Products, Fuel Cell Equipment and Technology Providers, General Analog and Mixed Signal Semiconductors, Heavy-Duty and High-End Batteries Manufacturing, Video Multimedia Semiconductors, General Analog and Mixed Signal Semiconductors, Carrier Edge Network Management Equipment, Customer Premises Network Security Equipment, Colocation and Data Center Services, Government IT Services, Network Security Access Policy Software, Network Security Software, Virtual Reality Design and Engineering Software, Home and Office Virtual Reality Software, Virtual Reality Equipment, Media Download and Streaming Digital Content Sites, Media and Entertainment Industry Software, Electronic Gaming Equipment, Electronic Gaming/Entertainment Electronics Makers, General Gaming Industries, General Gaming Products and Services, Online Gaming Systems, Multi-Type Games Software, Online Game Websites and Software, Handheld and Smart Phone Games Software.

“**Guideline**” shall have the meaning as defined in Section “Introduction”.

“**Index**” shall have the meaning as defined in Section “Introduction”.

“**Solactive**” shall have the meaning as defined in Section “Introduction”.

“**Benchmark Regulation**” shall have the meaning as defined in Section “Introduction”.

“**BMR**” shall have the meaning as defined in Section “Introduction”.

The “**Index Component**” is each share currently included in the Index.

The “**Total Shares**” are in respect of an Index Component and any given Business Day the number or fraction of shares included in the Index. It is calculated for any Index Component as the ratio of (A) the Percentage Weight of an Index Component multiplied by the Index value and the Divisor and (B) its Trading Price (converted into the Index Currency according to the principles laid out in Section 1.4 of this document).

The “**Percentage Weight**” of an Index Component is the ratio of its Trading Price multiplied by its Number of Shares divided by the Index value and the Divisor.

“Average Daily Traded Value” means, in respect of a Share, the sum of Daily Traded Value over a specified period divided by the number of Exchange Trading Days that fall in the specified period.

“Daily Traded Value” means, in respect of a Share and of an Exchange Trading Day, the product of (i) the Closing Exchange Price of such Share and (ii) the volume traded (measured as a number of Shares) of such Share on the Exchange during such Exchange Trading Day.

“**DATA PROVIDER**” is Minerva Analytics Ltd. For more information, please visit: www.minerva.info.

The “**Dividend Correction Factor**” is calculated as 1 minus the applicable withholding tax rate and/or other applicable tax rate currently prevalent in the respective country.

In particular, an “**Extraordinary Event**” is

- > a Merger
- > a Takeover Bid
- > a Delisting
- > the Nationalization of a company
- > Insolvency.

The Trading Price for this Index Component on the day the event came into effect is the last available market price for this Index Component quoted on the Exchange on the day the event came into effect (or, if a market price is not available for the day the event came into effect, the last available market price quoted on the Exchange on a day specified as appropriate by the Index Calculator) as determined by the Index Calculator, and this price is used as the Trading Price of the particular Index Component until the end of the day on which the composition of the Index is next set.

In the event of the Insolvency of an issuer of an Index Component, the Index Component shall remain in the Index until the next Adjustment Day. As long as a market price for the affected Index Component is available on a Business Day, this shall be applied as the Trading Price for this Index Component on the relevant Business Day, as determined in each case by the Index Calculator. If a market price is not available on a Business Day the Trading Price for this Index Component is set to zero. The Committee may also decide

to eliminate the respective Index Component at an earlier point in time prior to the next Adjustment Day. The procedure in this case is identical to an elimination due to an Extraordinary Event.

An Index Component is "**delisted**" if the Exchange announces pursuant to the Exchange regulations that the listing of, the trading in, or the issuing of public quotes on the Index Component at the Exchange has ceased immediately or will cease at a later date, for whatever reason (provided the Delisting is not because of a Merger or a Takeover Bid), and the Index Component is not immediately listed, traded or quoted again on an exchange, trading or listing system, acceptable to the Index Calculator.

"**Insolvency**" occurs with regard to an Index Component if (A) all shares of the respective issuer must be transferred to a trustee, liquidator, insolvency administrator or a similar public officer as result of voluntary or compulsory liquidation, insolvency or winding-up proceedings or comparable proceedings affecting the issuer of the Index Components or (B) the holders of the shares of this issuer are legally enjoined from transferring the shares.

A "**Takeover Bid**" is a bid to acquire, an exchange offer, or any other offer or act of a legal person that results in the related legal person acquiring as part of an exchange or otherwise more than 10% and less than 100% of the voting shares in circulation from the issuer of the Index Component or the right to acquire these shares, as determined by the Index Calculator based on notices submitted to public or self-regulatory authorities or other information considered by the Index Calculator to be relevant.

With regard to an Index Component, a "**Merger**" is

- (i) a change in the security class or a conversion of this share class that results in a transfer or an ultimate definite obligation to transfer all the shares in circulation to another legal person,
- (ii) a merger (either by acquisition or through forming a new structure) or a binding obligation on the part of the issuer to exchange shares with another legal person (except in a merger or share exchange under which the issuer of this Index Component is the acquiring or remaining company and which does not involve a change in security class or a conversion of all the shares in circulation),
- (iii) a takeover offer, exchange offer, other offer or another act of a legal person for the purposes of acquiring or otherwise obtaining from the issuer 100% of the shares issued that entails a transfer or the irrevocable obligation to transfer all shares (with the exception of shares that are held and controlled by the legal person), or
- (iv) a merger (either by acquisition or through forming a new structure) or a binding obligation on the part of the issuer of the share or its subsidiaries to exchange shares with another legal person, whereby the issuer of the share is the acquiring or remaining company and it does not involve a change in the class or a conversion of the all shares issued, but the shares in circulation directly prior to such an event (except for shares held and controlled by the legal person) represent in total less than 50% of the shares in circulation directly subsequent to such an event.

The "**Merger Date**" is the date on which a Merger is concluded or the date specified by the Index Calculator if such a date cannot be determined under the law applicable to the Merger.

"Nationalization" is a process whereby all shares or the majority of the assets of the issuer of the shares are nationalized or are expropriated or otherwise must be transferred to public bodies, authorities or institutions.

The **"Exchange"** is, in respect of the Index and every Index Component, the respective primary exchange where the Index Component has its primary listing. The Committee may decide to declare a different stock exchange the "Exchange" for trading reasons, even if the company is only listed there via a Stock Substitute.

A **"Stock Substitute"** includes in particular, American Depository Receipts (ADR) and Global Depository Receipts (GDR).

With regard to an Index Component (subject to the provisions given above under "Extraordinary Events") the **"Trading Price"** in respect of a Trading Day is the closing price on this Trading Day determined in accordance with the Exchange regulations. If the Exchange has no closing price for an Index Component, the Index Calculator shall determine the Trading Price and the time of the quote for the share in question in a manner that appears reasonable to it.

A **"Trading Day"** is in relation to the Index or an Index Component a Trading Day on the Exchange (or a day that would have been such a day if a market disruption had not occurred), excluding days on which trading may be ceased prior to the normal Exchange closing time. The Index Calculator is ultimately responsible as to whether a certain day is a Trading Day with regard to the Index or an Index Component or in any other connection relating to this document.

The **"Index Calculator"** is Solactive or any other appropriately appointed successor in this function.

The **"Index Currency"** is US Dollar.

The **"Security-level Market Capitalization"** is with regard to each of the securities in the Index on a Selection Day the share class-specific Capitalization for any security in the Index Universe. It is calculated as the multiplication of the shares outstanding of the share class (as sourced from data vendors) with the Trading Price of the share class as of the respective Selection Day.

A **"Business Day"** is any weekday from Monday through Friday.

The **"Adjustment Day"** is 15 Business Days after the Selection Day. If this happens to be a non-trading day at the New York Stock Exchange, the Adjustment Day will be on the following Business Day that is a trading day at the New York Stock Exchange.

The **"Selection Day"** is the last Business Day in February and August.

A **"Market Disruption Event"** occurs if

1. one of the following events occurs or exists on a Trading Day prior to the opening quotation time for an Index Component:
 - A) trading is suspended or restricted (due to price movements that exceed the limits allowed by the Exchange or an Affiliated Exchange, or for other reasons):
 - 1.1. across the whole Exchange; or

- 1.2. in options or futures contracts on or with regard to an Index Component or an Index Component that is quoted on an Affiliated Exchange; or
 - 1.3. on an Exchange or in a trading or quotation system (as determined by the Index Calculator) in which an Index Component is listed or quoted; or
 - B) an event that (in the assessment of the Index Calculator) generally disrupts and affects the opportunities of market participants to execute on the Exchange transactions in respect of a share included in the Index or to determine market values for a share included in the Index or to execute on an Affiliated Exchange transaction with regard to options and futures contracts on these shares or to determine market values for such options or futures contracts.
2. trading on the Exchange or an Affiliated Exchange is ceased prior to the "**Normal Exchange Closing Time**", which is the time at which the Exchange or an Affiliated Exchange is normally closed on working days without taking into account after-hours trading or other trading activities carried out outside the normal trading hours. An exception to this classification as a Market Disruption Event is where the early cessation of trading is announced by the Exchange or Affiliated Exchange on this Trading Day at least one hour before
 - 2.1. the actual closing time for normal trading on the Exchange or Affiliated Exchange on the Trading Day in question or, if earlier.
 - 2.2. the closing time (if given) of the Exchange or Affiliated Exchange for the execution of orders at the time the quote is given.
 3. a general moratorium is imposed on banking transactions in the country in which the Exchange is resident if the above-mentioned events are material in the assessment of the Index Calculator, whereby the Index Calculator makes its decision based on those circumstances that it considers reasonable and appropriate.

INDEX GUIDELINE

Changes in calculation method

Version 2.0 – 28 February 2023

5 CHANGES IN CALCULATION METHOD

The application by the Index Calculator of the method described in this document is final and binding. The Index Calculator shall apply the method described above for the composition and calculation of the Index. However, it cannot be excluded that the market environment, supervisory, legal, financial or tax reasons may require changes to be made to this method. The Index Calculator may also make changes to the terms and conditions of the Index and the method applied to calculate the Index that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The Index Calculator is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the Index Calculator will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

6 HISTORY OF INDEX CHANGES

Version	Date	Description
1.1	28 August 2020	Historical changes are not specified
1.2	25 February 2022	Adding ESG criteria in index selection (section 2.1)
