INTRODUCTION

This document (the "**GUIDELINE**") is to be used as a guideline with regard to the composition, calculation and maintenance of the Solactive ISS ESG Screened Paris Aligned Nordic Index Series (the "**INDEX**"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE specified in Section 5.5. The INDEX is owned, calculated, administered and published by Solactive AG ("**SOLACTIVE**") assuming the role as administrator (the "**INDEX ADMINISTRATOR**") under the Regulation (EU) 2016/1011 (the "**BENCHMARK REGULATION**" or "**BMR**"). The name "Solactive" is trademarked.

The text uses defined terms which are formatted with "SMALL CAPS". Such Terms shall have the meaning assigned to them as specified in Section 6 (Definitions).

The GUIDELINE and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to issuers – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

1. INDEX SPECIFICATIONS

1.1. SCOPE OF THE INDEX

Category	Description
Asset Class	Equity
Strategy	The Solactive ISS ESG Screened Paris Aligned Nordic Index Series aims to track various size and regional segments of the Nordic stock market. The underlying assets are selected in such a manner that the resulting benchmark portfolio's GHG emissions are aligned with the long-term global warming target of the Paris Climate Agreement, including only companies operating in accordance with market standards for responsible business conduct (Norms-Based Research) and controversial weapons. Those standards are based on established norms such as the United Nations Global Compact and the exclusion of significant involvement in defined sectors. In addition, certain activities are excluded from the index based fixed revenue thresholds. The series operates in line with the regulations laid out for EU Paris-Aligned Benchmarks (EU PAB) in Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards the minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.
Regional Allocation	Nordics
Rebalancing Fee	-
Rebalancing Frequency	Semi-annually

1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Type	RIC	BBG ticker
Solactive ISS ESG Screened Paris Aligned Nordic Index PR	DE000SL0DXW4	SEK	PR*	.SSPABNOP	-
Solactive ISS ESG Screened Paris Aligned Nordic Index NTR	DE000SL0DXX2	SEK	NTR*	.SSPABNON	SSPABNON

Solactive ISS ESG Screened Paris Aligned Nordic Index TR	DE000SL0DX0	SEK	GTR*	.SSPABNOT	-
Solactive ISS ESG Screened Paris Aligned Norway Index PR	DE000SL0DXZ7	NOK	PR*	.SSPABNWP	-
Solactive ISS ESG Screened Paris Aligned Norway Index NTR	DE000SL0DX02	NOK	NTR*	.SSPABNWN	SSPABNWN
Solactive ISS ESG Screened Paris Aligned Norway Index TR	DE000SL0DX10	NOK	GTR*	.SSPABNWT	-

*PR, NTR, GTR means that the Index is calculated as price return, net total return, gross total return Index as described in the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>

The INDEX is published on the website of the INDEX ADMINISTRATOR (www.solactive.com) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <https://www.solactive.com/news/announcements/>.

1.3. INITIAL LEVEL OF THE INDEX

The initial level of the INDEX on the 12/06/2020, the START DATE, is 1000. Historical values from the 04/08/2021 the LIVE DATE, will be recorded in accordance with Article 8 of the BMR. Levels of the INDEX published for a period prior to the LIVE DATE have been back-tested. The INDEX follows a decarbonization trajectory that was initially, as of the LIVE DATE, based on the 02/11/2020. Due to substantial changes in the methodology of the input data provided by the DATA PROVIDER, the decarbonization trajectory was re-based to 02/05/2022, the BASE DAY.

1.4. PRICES AND CALCULATION FREQUENCY

The level of the INDEX is calculated on each CALCULATION DAY from 9:00 a.m. to 10:50 p.m. CET based on the TRADING PRICES on the EXCHANGES on which the INDEX COMPONENTS are listed. TRADING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the current Intercontinental Exchange (ICE) spot foreign exchange rate. Should there be no current TRADING PRICE for an INDEX COMPONENT, the later of: (i) the most recent CLOSING PRICE; or (ii) the last available TRADING PRICE for the preceding TRADING DAY is used in the calculation.

In addition to the intraday calculation a closing level of the INDEX for each CALCULATION DAY is also calculated. This closing level is based on the CLOSING PRICES for the INDEX COMPONENTS on the respective EXCHANGES on which the INDEX COMPONENTS are listed. The CLOSING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the 04:00 p.m. London time WM Fixing quoted by Reuters. If there

is no 04:00 p.m. London time WM Fixing for the relevant CALCULATION DAY, the last available 04:00 p.m. London time WM Fixing will be used for the closing level calculation.

1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by SOLACTIVE.

2. INDEX SELECTION

On each SELECTION DAY, the INDEX ADMINISTRATOR will revise the composition of the INDEX.

In a first step, the INDEX ADMINISTRATOR determines the INDEX UNIVERSE in accordance with Section 2.1. The INDEX UNIVERSE comprises all those financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS (as specified in Section 2.1) and will constitute a starting pool from which the components of the INDEX will be selected. Based on this INDEX UNIVERSE, the new composition of the INDEX will be determined by applying the rules outlined in Section 2.2.

Each new INDEX COMPONENT will be assigned a weight as described in Section 2.3.

2.1. INDEX UNIVERSE REQUIREMENTS

The INDEX UNIVERSE is comprised of all financial instruments which fulfill the below requirements (the “INDEX UNIVERSE REQUIREMENTS”):

Index	Index Universe
Solactive ISS ESG Screened Paris Aligned Nordic Index	Component of the BENCHMARK INDEX UNIVERSE of the Solactive Nordic Investable Market Index PR (ISIN: DE000SLOC3K4), the PARENT INDEX, on a SELECTION DAY, as published on the SOLACTIVE website: https://www.solactive.com .
Solactive ISS ESG Screened Paris Aligned Norway Index	Component of the BENCHMARK INDEX UNIVERSE of the Solactive Norway Investable Market Index PR (ISIN: DE000SLOC4J4), the PARENT INDEX, on a SELECTION DAY, as published on the SOLACTIVE website: https://www.solactive.com .

The determination of the INDEX UNIVERSE is fully rule-based and the INDEX ADMINISTRATOR cannot make any discretionary decisions.

2.2. SELECTION OF THE INDEX COMPONENTS

Based on the INDEX UNIVERSE, the initial composition of the INDEX as well as any selection for an ordinary rebalance is determined on the SELECTION DAY in accordance with the following rules (the “INDEX COMPONENT REQUIREMENTS”):

All companies in the respective INDEX UNIVERSE are evaluated based on the criteria outlined in the table below. The evaluation is based on data provided by the DATA PROVIDER:

Theme	Topic	Exclusion criterion
Norm-Based Research	Environment	

	Human Rights	Verified failure to respect established norms
	Corruption	
	Labour Rights	
	Companies incorporated in countries identified with high social risk	More than 50% ownership by the state Alleged failure to respect established norms
Controversial Weapons Research	Chemical weapons	Verified ongoing involvement
	Biological weapons	
	Nuclear weapons	
	Depleted Uranium	
	Nuclear weapons outside the NPT	
	Cluster munitions	
	Anti-personnel mines	
	Coal	1% Production & Refining Generally: 5% Production, Distribution & Exploration Exception 1: Max 10% Production, Distribution & Exploration <AND> min 10% Revenues from Renewable Energies Power Generation <AND> max 5% Revenues from Coal Power Generation <AND> Concrete science-based target
	Fossil Fuel	Exception 2: 0% Oil Extraction, Oil Refinement & Fossil Fuel Exploration <AND> max 10% Oil distribution <AND> max 50% Gas Extraction, Gas Refinement & Fossil Fuel Distribution <AND> Concrete science-based target <AND> min 10% Revenues from Renewable Energies Power Generation <AND> max 5% Revenues from Coal Power Generation <AND> company sector "Utilities" according to the FactSet sector classification system.
Activity-Based Screening	Fossil Fuel	50% Overall
	Oil Sands	0% Production & Exploration

	Military Equipment	5% Production <OR> 5% Distribution <OR> 50% Services
	Pornography	0% Production <OR> 5% overall
	Tobacco	0% Production <OR> 5% Distribution <OR> 50% Services
	Gambling	5% Production & Distribution <OR> 50% Services
	Alcohol	5% Production & Distribution <OR> 50% Services
	Non-pharmaceutical Cannabis	5% Production & Distribution <OR> 50% Services
Environmental Objectives	ISS ESG "Do No Significant Harm" Criteria: Pollution, Air Pollution, Water Pollution, Soil Pollution, Deforestation. Biodiversity & Environmental Impacts	Verified failure to respect established norms <OR> Alleged failure to respect established norms where the Remediation efforts taken by the company are assessed to be insufficient.
	Sustainable Development Goal 12: Responsible Consumption and Production	
	Sustainable Development Goal 13: Climate Action	
	Sustainable Development Goal 14: Life Below Water	
	Sustainable Development Goal 15: Life on Land	
Explanation: % figures refer to revenue threshold (for degree of involvement) above which criterion is breached		

All companies violating any of the exclusion criteria above are excluded. All companies for which an evaluation of these exclusion criteria is not possible due to insufficient and/or missing information or data are excluded.

The selection of the INDEX COMPONENTS is fully rule-based and the INDEX ADMINISTRATOR cannot make any discretionary decisions.

2.3. WEIGHTING OF THE INDEX COMPONENTS

On each SELECTION DAY the CARBON INTENSITY of each INDEX COMPONENT is calculated, based on data provided by the DATA PROVIDER.

The weights on the BASE DAY are assigned according to the following steps:

1. The CARBON INTENSITY of the PARENT INDEX is calculated by weighting the CARBON INTENSITY of the components of the BENCHMARK INDEX UNIVERSE of the PARENT INDEX by the weight of the respective components of the BENCHMARK INDEX UNIVERSE of the PARENT INDEX.
2. Each INDEX COMPONENT is assigned a weight in line with the requirements for EU Paris-aligned Benchmarks. I.e., an optimization is applied that minimizes the cumulative squared weight deviation from the PARENT INDEX on each SELECTION DAY, subject to the following constraints:
 - a. Reduce the CARBON INTENSITY of the INDEX compared to the CARBON INTENSITY of the PARENT INDEX by at least 55%.
 - b. Maximum absolute weight deviation from the weight in the PARENT INDEX is capped at the minimum of 2% and 10 times the weight in the PARENT INDEX. Individual Weights are floored at 0.0001%. Moreover, Individual weights are capped based on the securities' MEDIAN DAILY VALUE TRADED according to below formula:

$$\max weight_i = \frac{MDVT_i}{1.000.000.000}$$

Where:

MDVT_i: Security i's minimum MEDIAN DAILY VALUE TRADED over the preceding 1-month and 6-month period in SEK.

- c. Compared to the PARENT INDEX, absolute deviation of the sector weights is capped at 5%. If the cumulative maximum possible weight, as detailed in step 2.b., of all INDEX COMPONENTS in a sector is less than what is required to achieve this sector weight constraint, the cumulative maximum possible weight of all INDEX COMPONENTS is set as the minimum sector weight for this sector.
- d. Compared to the PARENT INDEX, absolute deviation of the country weights is capped at 5%. If the cumulative maximum possible weight, as detailed in step 2.b., of all INDEX COMPONENTS in a country is less than what is required to achieve this country weight constraint, the cumulative maximum possible weight of all INDEX COMPONENTS is set as the minimum country weight for this country.
- e. Compared to the PARENT INDEX, exposure to HIGH CLIMATE IMPACT SECTORS must not decrease.
- f. Weights of companies committing themselves to set science-based targets shall increase by at least 10% relative to the respective weight in the PARENT INDEX. If this is in conflict with

- 2.b., the allowed maximum absolute weight deviation from the weight in the PARENT INDEX is increased to match the 10% weight increase requirement.
- g. Weights of companies with "Green Revenue" measured as companies with significant positive contribution to the environmentally linked Sustainable Development Goals (ISS ESG Environmental Score of 5 or more) shall increase by at least 10% relative to the respective weight in the PARENT INDEX. If this is in conflict with 2.b., the allowed maximum absolute weight deviation from the weight in the PARENT INDEX is increased to match the 10% weight increase requirement.
 - h. The one-way turnover on each SELECTION DAY is capped at 5%.
3. If no solution can be found, the constraints are relaxed in the following order:
- a. Maximum one-way turnover is increased by 2.5%. Maximum absolute deviation of the sector and country weights (i.e. constraints 2.c & 2.d) is simultaneously increased by 1%. Weights of companies committing themselves to set science-based targets shall be at least equal to the respective weight in the PARENT INDEX.
 - b. If no solution is reached, maximum one-way turnover is continuously increased in two steps of 2.5% until 12.5%. Maximum absolute deviation of the sector and country weights (i.e. constraints 2.c & 2.d) is simultaneously increased in two steps of 1%. Additionally, the constraint in section 2. f. is fully suspended.
 - c. If still no solution is reached, maximum one-way turnover is continuously increased in steps of 2.5%. Maximum absolute deviation of the sector and country weights (i.e. constraints 2.c & 2.d) is simultaneously increased in steps of 1%. In parallel, maximum absolute weight deviation from the weight in the PARENT INDEX is iteratively increased by 0.1% to a maximum of 10 times the weight in the PARENT INDEX until a solution is found. Additionally, the constraint in section 2. f. is fully suspended.

On each following SELECTION DAY each INDEX COMPONENT is assigned a weight subject to the following steps:

1. The CARBON INTENSITY of the PARENT INDEX is calculated by weighting the CARBON INTENSITY of the components of the BENCHMARK INDEX UNIVERSE of the PARENT INDEX by the weight of the respective components of the BENCHMARK INDEX UNIVERSE of the PARENT INDEX.
2. Each INDEX COMPONENT is assigned a weight in line with the requirements for EU Paris-aligned Benchmarks. I.e., an optimization is applied that minimizes the cumulative squared weight deviation from the PARENT INDEX on each SELECTION DAY, subject to the following constraints:
 - a. The decarbonization trajectory is defined by an annual minimum Carbon Intensity reduction of 7% compared to the CARBON INTENSITY of the INDEX on the BASE DAY in a geometric progression. The CARBON INTENSITY of the INDEX is capped at the minimum of the

CARBON INTENSITY of the decarbonization trajectory on the SELECTION DAY and 55% of PARENT INDEX CARBON INTENSITY on the SELECTION DAY.

- b. Maximum absolute weight deviation from the weight in the PARENT INDEX is capped at the minimum of 2% and 10 times the weight in the PARENT INDEX. Individual Weights are floored at 0.0001%. Moreover, Individual weights are capped based on the securities' MEDIAN DAILY VALUE TRADED according to below formula:

$$\text{max weight}_i = \frac{MDVT_i}{1.000.000.000}$$

- c. Compared to the PARENT INDEX, absolute deviation of the sector weights is capped at 5%. If the cumulative maximum possible weight, as detailed in step 2.b., of all INDEX COMPONENTS in a sector is less than what is required to achieve this sector weight constraint, the cumulative maximum possible weight of all INDEX COMPONENTS is set as the minimum sector weight for this sector.
- d. Compared to the PARENT INDEX, absolute deviation of the country weights is capped at 5%. If the cumulative maximum possible weight, as detailed in step 2.b., of all INDEX COMPONENTS in a country is less than what is required to achieve this country weight constraint, the cumulative maximum possible weight of all INDEX COMPONENTS is set as the minimum country weight for this country.
- e. Compared to the PARENT INDEX, exposure to HIGH CLIMATE IMPACT SECTORS must not decrease.
- f. Weights of companies committing themselves to set science-based targets shall increase by at least 10% compared to the respective weight in the PARENT INDEX. If this is in conflict with 2.b., the allowed maximum absolute weight deviation from the weight in the PARENT INDEX is increased to match the 10% weight increase requirement.
- g. Weights of companies with "Green Revenue" measured as companies with significant positive contribution to the environmentally linked Sustainable Development Goals (ISS ESG Environmental Score of 5 or more) shall increase by at least 10% relative to the respective weight in the PARENT INDEX. If this is in conflict with 2.b., the allowed maximum absolute weight deviation from the weight in the PARENT INDEX is increased to match the 10% weight increase requirement.
- h. The one-way turnover on each SELECTION DAY is capped at 5%.
- i. Individual Weights are capped at 20.00%.
3. If no solution can be found, the constraints are relaxed in the following order:
- a. Maximum one-way turnover is increased by 2.5%. Maximum absolute deviation of the sector and country weights (i.e. constraints 2.c & 2.d) is simultaneously increased by 1%. Weights of companies committing themselves to set science-based targets shall be at least equal to the respective weight in the PARENT INDEX.

- b. If no solution is reached, maximum one-way turnover is continuously increased in two steps of 2.5% until 12.5%. Maximum absolute deviation of the sector and country weights (i.e. constraints 2.c & 2.d) is simultaneously increased in two steps of 1%. Additionally, the constraint in section 2. f. is fully suspended.
- c. If still no solution is reached, maximum one-way turnover is continuously increased in steps of 2.5%. Maximum absolute deviation of the sector and country weights (i.e. constraints 2.c & 2.d) is simultaneously increased in steps of 1%. In parallel, maximum absolute weight deviation from the weight in the PARENT INDEX is iteratively increased by 0.1% to a maximum of 10 times the weight in the PARENT INDEX until a solution is found. Additionally, the constraint in section 2. f. is fully suspended.

3. REBALANCE

3.1. ORDINARY REBALANCE

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1 and 2.2) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

This is carried out by implementing the shares as determined on the FIXING DAY based on the weights calculated on the SELECTION DAY.

For more information on the rebalance procedure please refer to the Equity Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DAY on the SOLACTIVE webpage under the section "Announcement", which is available at <https://www.solactive.com/news/announcements/>.

3.2. EXTRAORDINARY REBALANCE

In addition to the ordinary rebalance, the INDEX is also rebalanced extraordinarily. These adjustments take place outside the rebalancing schedule and follow different rules than the ordinary rebalances. The extraordinary rebalance is triggered by the mechanism described below:

An extraordinary removal of an INDEX COMPONENT takes place if such INDEX COMPONENT exhibits a very severe controversy with respect to Norm-Based Research or exhibits verified ongoing involvement with respect to Controversial Weapons Research as outlined in Section 2.2. SOLACTIVE will carry out such removal semi-annually after the CLOSE OF BUSINESS on the last CALCULATION DAY of August and February if it is informed by the DATA PROVIDER about the breach at least ten CALCULATION DAYS before the last CALCULATION DAY of these months. The weight of the INDEX COMPONENT in question will be distributed pro-rata across all other existing INDEX COMPONENTS.

4. CALCULATION OF THE INDEX

4.1. INDEX FORMULA

The INDEX is calculated as a price return, net total return, gross total return Index.

The calculation is performed according to the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. The divisor index formula stipulates that the level of the INDEX changes based on the change of the prices of its INDEX COMPONENTS taking into account their weight in the INDEX and any currency conversion in case the price of an INDEX COMPONENT is quoted in a currency other than the INDEX CURRENCY.

Any dividends or other distributions are reinvested across the entire basket of INDEX COMPONENTS by means of a divisor at the opening of the effective date (the so-called ex-date) of the payment of such dividend or other distribution.]

A more detailed description of the mechanics of the index calculation formula can be found in the Equity Index Methodology under Section 1.2.

4.2. ACCURACY

The level of the INDEX will be rounded to six decimal places. Divisors will be rounded to six decimal places. TRADING PRICES and foreign exchange rates will be rounded to six decimal places.

4.3. ADJUSTMENTS

Under certain circumstances, an adjustment of the INDEX may be necessary between two regular REBALANCE DAYS. Such adjustment has to be made if a corporate action (as specified in Section 4.4 below) in relation of an INDEX COMPONENT occurs. Such adjustment may have to be done in relation to an INDEX COMPONENT and/or may also affect the number of INDEX COMPONENTS and/or the weighting of certain INDEX COMPONENTS and will be made in compliance with the Solactive Equity Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

SOLACTIVE will announce the INDEX adjustment giving a notice period of at least two TRADING DAYS (with respect to the affected INDEX COMPONENT) on the SOLACTIVE website under the Section "Announcements", which is available at <https://www.solactive.com/news/announcements/>. The INDEX adjustments will be implemented on the effective day specified in the respective notice.

4.4. CORPORATE ACTIONS

As part of the INDEX maintenance SOLACTIVE will consider various events – also referred to as corporate actions – which result in an adjustment to the INDEX between two regular REBALANCE DAYS. Such events have a material impact on the price, weighting or overall integrity of INDEX COMPONENTS. Therefore, they need to be accounted for in the calculation of the INDEX. Corporate actions will be implemented from the cum-day to the ex-day of the corporate action, so that the adjustment to the INDEX coincides with the occurrence of the price effect of the respective corporate action.

Adjustments to the INDEX to account for corporate actions will be made in compliance with the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. This document contains for each corporate action a brief definition and specifies the relevant adjustment to the INDEX variables.

Deviating from the information provided in the withholding tax rate table available at <https://www.solactive.com/documents/> the applicable withholding tax rate for Sweden is 0%, for Finland is 0%, for Norway 0%, and for Denmark is 27% for the Index.

While SOLACTIVE aims at creating and maintaining its methodology for treatment of corporate actions as generic and transparent as possible and in line with regulatory requirements, it retains the right in accordance with the Equity Index Methodology to deviate from these standard procedures in case of any unusual or complex corporate action or if such a deviation is made to preserve the comparability and representativeness of the INDEX over time.

SOLACTIVE considers following, but not conclusive, list of corporate actions as relevant for INDEX maintenance:

- > Cash Distributions (e.g. payment of a dividend)
- > Stock distributions (e.g. payment of a dividend in form of additional shares)
- > Stock distributions of another company (e.g. payment of a dividend in form of additional shares of another company (e.g. of a subsidiary))
- > Share splits (company's present shares are divided and therefore multiplied by a given factor)
- > Reverse splits (company's present shares are effectively merged)
- > Capital increases (such as issuing additional shares)
- > Share repurchases (a company offer its shareholders the option to sell their shares to a fixed price)
- > Spin-offs (the company splits its business activities into two or more entities and distributes new equity shares in the created entities to the shareholders of the former entity)

- > Mergers & Acquisitions (transaction in which the ownership of a company (or other business organizations) are transferred or consolidated with other entities, e.g. fusion of two or more separate companies into one entity)
- > Delistings (company's shares are no longer publicly traded at a stock exchange)
- > Nationalization of a company (effective control of a legal entity is taken over by a state)
- > Insolvency

4.5. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

4.6. MARKET DISRUPTION

In periods of market stress SOLACTIVE calculates its indices following predefined and exhaustive arrangements as described in the Solactive Disruption Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/disruption-policy/>. Such market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. The determination of the INDEX may be limited or impaired at times of illiquid or fragmented markets and market stress.

5. MISCELLANEOUS

5.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX UNIVERSE (if applicable), the selection of the INDEX COMPONENTS (if applicable) or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement.

5.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Solactive Methodology Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section "[Announcement](https://www.solactive.com/news/announcements/)", which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

5.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal and financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

5.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt Index methodologies to changing underlying markets (see Section 5.2 "Methodology Review") in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the index, the index rules, and particularly the selection criteria, can no longer be applied coherently or the index is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of an index is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

5.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the "**OVERSIGHT COMMITTEE**") is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

6. DEFINITIONS

“**BASE DAY**” shall have the meaning as defined in Section 1.3.

“**BENCHMARK REGULATION**” shall have the meaning as defined in Section “Introduction”.

“**BENCHMARK INDEX UNIVERSE**” is the Index Selection as defined in the guideline of the Solactive Nordic Investable Market Index Series (<https://solactive.com/downloads/Guideline-Solactive-SOLNOIM.pdf>) for the respective PARENT INDEX.

“**BMR**” shall have the meaning as defined in Section “Introduction”.

“**CALCULATION DAY**” is every weekday from Monday to Friday.

“**CARBON INTENSITY**” on the SELECTION DAY is calculated as:

$$\text{CARBON INTENSITY} = \frac{\text{GHG}}{\text{EVIC}}$$

If the CARBON INTENSITY is not computable for a company due to missing data, the company receives the median CARBON INTENSITY of all the securities in the same industry. If the company is not classified in an industry, the company receives the median CARBON INTENSITY of all companies classified in an industry.

If the average EVIC of the PARENT INDEX has increased or decreased during the last calendar year, the EVIC of an INDEX COMPONENT shall be adjusted by an adjustment factor. The factor is calculated as the average EVIC of the PARENT INDEX at the end of the latest calendar year, divided by the average EVIC of the PARENT INDEX at the end of the previous calendar year.

“**CLOSE OF BUSINESS**” is the calculation time of the closing level of the INDEX as outlined in Section 1.4.

The “**CLOSING PRICE**” in respect of an INDEX COMPONENT and a TRADING DAY is a security's final regular-hours TRADING PRICE published by the EXCHANGE and determined in accordance with the EXCHANGE regulations. If the EXCHANGE has no or has not published a CLOSING PRICE in accordance with the EXCHANGE rules for an INDEX COMPONENT, the last TRADING PRICE will be used.

“**DATA PROVIDER**” is ISS. For more information, please visit: <https://www.issgovernance.com/>

“**EVIC**” is the Enterprise Value including Cash in USD as of the last fiscal year-end, on the respective SELECTION DAY.

“**MEDIAN DAILY VALUE TRADED**” means, in respect of an INDEX COMPONENT, the middle value of DAILY VALUE TRADED over the specified period when those DAILY VALUE TRADED are listed in order from smallest to greatest.

“**EXCHANGE**” is with respect to the INDEX and every INDEX COMPONENT, the respective exchange where the INDEX COMPONENT has its listing as determined in accordance with the rules in Section 2.

“**FIXING DAY**” is the SELECTION DAY.

“GHG” are the Greenhouse Gas Emissions of a company as of the SELECTION DAY. According to the GHG Protocol¹, the GHG metric is calculated as the sum of Scope 1, Scope 2, and Scope 3 emissions. In particular:

- > Scope 1 emissions: All direct Greenhouse Gas Emissions;
- > Scope 2 emissions: Indirect Greenhouse Gas Emissions from consumption of purchased electricity, heat or steam;
- > Scope 3 emissions: Other indirect emissions, such as the extraction and production of purchased materials and fuels, transport-related activities in vehicles not owned or controlled by the reporting entity, electricity-related activities (e.g. transmission and distribution losses) not covered in Scope 2, outsourced activities, use of sold products, waste disposal, etc. There are existing international and European standards on the matter, i.e. ISO 14064 on standards for greenhouse gas accounting and verification, and the Product Environmental Footprint (PEF) and Organisation Environmental Footprint (OEF), that could serve for the calculation of scope 3 emissions

“GUIDELINE” shall have the meaning as defined in Section “Introduction”.

“HIGH CLIMATE IMPACT SECTORS” are sectors that are key to the low-carbon transition. HIGH CLIMATE IMPACT SECTORS are the following:

NACE Section Code	NACE Section Name
A	AGRICULTURE, FORESTRY AND FISHING
B	MINING AND QUARRYING
C	MANUFACTURING
D	ELECTRICITY; GAS; STEAM AND AIR CONDITIONING SUPPLY
E	WATER SUPPLY; SEWERAGE; WASTE MANAGEMENT AND REMEDIATION ACTIVITIES
F	CONSTRUCTION
G	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES
H	TRANSPORTATION AND STORAGE
L	REAL ESTATE ACTIVITIES

¹ See Greenhouse Gas Protocol at <https://ghgprotocol.org/>.

“**INDEX**” shall have the meaning as defined in Section “Introduction”.

“**INDEX ADMINISTRATOR**” shall have the meaning as defined in Section “Introduction”.

“**INDEX COMPONENT**” is each security reflected in the INDEX.

“**INDEX COMPONENT REQUIREMENTS**” shall have the meaning as defined in Section 2.2.

“**INDEX CURRENCY**” is the currency specified in the column “Currency” in the table in Section 1.2.

“**INDEX UNIVERSE REQUIREMENTS**” shall have the meaning as defined in Section 2.1.

“**INDEX UNIVERSE**” is the sum of all financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS.

“**LIVE DATE**” shall have the meaning as defined in Section 1.3.

“**OVERSIGHT COMMITTEE**” shall have the meaning as defined in Section 5.5.

“**PARENT INDEX**” is, depending on the regional segment of the INDEX series, the following:

Index	Index Universe
Solactive ISS ESG Screened Paris Aligned Nordic Index	Solactive Nordic Investable Market Index PR (ISIN: DE000SLOC3K4), as published on the SOLACTIVE website: https://www.solactive.com .
Solactive ISS ESG Screened Paris Aligned Norway Index	Solactive Norway Investable Market Index PR (ISIN: DE000SLOC4J4), as published on the SOLACTIVE website: https://www.solactive.com .

“**REBALANCE DAY**” is the close of the last CALCULATION DAY in May and November. If this is not a TRADING DAY, the REBALANCE DAY is moved to the next TRADING DAY.

“**SELECTION DAY**” is 30 CALCULATION DAYS before the scheduled REBALANCE DAY.

“**SOLACTIVE**” shall have the meaning as defined in Section “Introduction”.

“**START DATE**” shall have the meaning as defined in Section 1.3.

“**TRADING DAY**” is with respect to an INDEX COMPONENT included in the INDEX at the REBALANCE DAY and every INDEX COMPONENT included in the INDEX at the CALCULATION DAY immediately following the REBALANCE DAY (for clarification: this provision is intended to capture the TRADING DAYS for the securities to be included in the INDEX as new INDEX COMPONENTS with close of trading on the relevant EXCHANGE on the REBALANCE DAY) a day on which the relevant EXCHANGE is open for trading (or a day that would have been such a day if a market disruption had not occurred), excluding days on which trading may be ceased prior to the scheduled EXCHANGE closing time and days on which the EXCHANGE is open for a scheduled shortened period. The INDEX ADMINISTRATOR is ultimately responsible as to whether a certain day is a TRADING DAY.

The “**TRADING PRICE**” in respect of an INDEX COMPONENT and a TRADING DAY is the most recent published price at which the INDEX COMPONENT was traded on the respective EXCHANGE.

7. History of Index Changes

Version	Date	Description
1.0	2021-08-04	Index Guideline creation
1.1	2023-04-11	Change in weighting scheme
1.2	2024-03-25	Change in Rebalance and Selection dates
1.3	2024-03-27	Change in weight capping
1.4	2024-04-04	Adjusted threshold for revenues from Coal Power Generation
