## INTRODUCTION

This document (the "**GUIDELINE**") is to be used as a guideline with regard to the composition, calculation and maintenance of the SOLACTIVE UNITED STATES BENCHMARK SERIES (the "**INDICES**" and individually the "**INDEX**"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE specified in Section 5.5. The INDEX is owned, calculated, administered, and published by Solactive AG ("**SOLACTIVE**") assuming the role as administrator (the "**INDEX ADMINISTRATOR**") under the Regulation (EU) 2016/1011 (the "**BENCHMARK REGULATION**" or "**BMR**"). The name "Solactive" is trademarked.

*The text uses defined terms which are formatted with "SMALL CAPS". Such Terms shall have the meaning assigned to them as specified in Section 6 (Definitions).*

The GUIDELINE and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. SOLACTIVE does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. SOLACTIVE strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for SOLACTIVE – irrespective of possible obligations to issuers – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by SOLACTIVE does not constitute a recommendation for capital investment and does not contain any assurance or opinion of SOLACTIVE regarding a possible investment in a financial instrument based on this INDEX.

# 1. INDEX SPECIFICATIONS

## 1.1. SCOPE OF THE INDEX

Category	Description
Asset Class	Equity
Strategy	The SOLACTIVE UNITED STATES BENCHMARK SERIES intends to track the performance of various size segments of the United States stock market.
Regional Allocation	United States
Rebalancing Fee	--
Rebalancing Frequency	Quarterly

## 1.2. IDENTIFIERS AND PUBLICATION

Details on the individual INDICES (identifiers, currencies and return versions) of the SOLACTIVE UNITED STATES BENCHMARK SERIES are contained in the list of published SOLACTIVE UNITED STATES BENCHMARK SERIES INDICES available on the SOLACTIVE website: <https://solactive.com/downloads/Solactive-United-States-Benchmark-Series-List-of-published-Indices.pdf>.

The INDICES are calculated as price return, net total return, and gross total return index as described in the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

The INDICES are published on the website of the INDEX ADMINISTRATOR ([www.solactive.com](http://www.solactive.com)) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDICES via its information systems.

Any publication in relation to the INDICES (e.g., notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <https://www.solactive.com/news/announcements/>.

## 1.3. INITIAL LEVEL OF THE INDEX

The initial level of the INDICES except the AR index on the 07/06/2006, the START DATE, is 1,000. For the SOLACTIVE UNITED STATES 2000 EUR DECREMENT 50 INDEX, the initial level on the 24/07/2023, the START DATE, is 1,017. Historical values from the LIVE DATE, as shown in Section 1.2, will be recorded in accordance with Article 8 of the BMR. Levels of the INDEX published for a period prior to the LIVE DATE have been back-tested.

The LIVE DATE of each INDEX is stated in the list of published SOLACTIVE UNITED STATES BENCHMARK SERIES INDICES available on the SOLACTIVE website: <https://solactive.com/downloads/Solactive-United-States-Benchmark-Series-List-of-publishedIndices.pdf>.

## 1.4. PRICES AND CALCULATION FREQUENCY

The level of the INDEX is calculated on each CALCULATION DAY from 9:30 a.m. to 4:50 p.m. EST based on the TRADING PRICES on the EXCHANGES on which the INDEX COMPONENTS are listed. TRADING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the current Intercontinental Exchange (ICE) spot foreign exchange rate. Should there be no current TRADING PRICE for an INDEX COMPONENT, the later of: (i) the most recent CLOSING PRICE; or (ii) the last available TRADING PRICE for the preceding TRADING DAY is used in the calculation.

In addition to the intraday calculation a closing level of the INDEX for each CALCULATION DAY is also calculated. This closing level is based on the CLOSING PRICES for the INDEX COMPONENTS on the respective EXCHANGES on which the INDEX COMPONENTS are listed. The CLOSING PRICES of INDEX COMPONENTS not listed in the INDEX CURRENCY are converted using the 04:00 p.m. London time rates provided by WM/Refinitiv (the **“WM/Refinitiv Rate”**). If there is no 04:00 p.m. London time WM/REFINITIV RATE for the relevant CALCULATION DAY, the last available 04:00 p.m. London time WM/REFINITIV RATE will be used for the closing level calculation.

## 1.5. LICENSING

Licenses to use the INDEX as the underlying value for financial instruments, investment funds and financial contracts may be issued to stock exchanges, banks, financial services providers and investment houses by SOLACTIVE.

## 2. INDEX SELECTION

On each SELECTION DAY, the INDEX ADMINISTRATOR will revise the composition of the INDEX.

In a first step, the INDEX ADMINISTRATOR determines the INDEX UNIVERSE in accordance with Section 2.1. The INDEX UNIVERSE comprises all those financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS (as specified in Section 2.1) and will constitute a starting pool from which the components of the INDEX will be selected. Based on this INDEX UNIVERSE, the new composition of the INDEX will be determined by applying the rules outlined in Section 2.2.

Each new INDEX COMPONENT will be assigned a weight as described in Section 2.3.

### 2.1. INDEX UNIVERSE REQUIREMENTS

The INDEX UNIVERSE is comprised of all financial instruments which fulfill the below requirements (the “INDEX UNIVERSE REQUIREMENTS”):

1. Eligible Stock Exchanges: BATS Exchange, Investors Exchange, NASDAQ Stock Exchange, New York Stock Exchange, NYSE American, NYSE Arca
2. Tradability Requirements:
  - New (Current) INDEX COMPONENTS require an AVERAGE DAILY VALUE TRADED of at least USD 10,000 (7,500) over the preceding 1-month and 6-month period.
  - New (Current) INDEX COMPONENTS require a volume of at least 10,000 (7,500) shares over the preceding 1-month period and 60,000 (45,000) shares over the preceding 6-month period.
  - New (Current) INDEX COMPONENTS require a Free Float percentage of at least 10% (7.5%).
  - INDEX COMPONENTS must have less than 10 non-TRADING DAYS over the preceding 3-month period.

The tradability requirements of companies with a listing date that lies within the 3-month period prior to the Selection Day are modified as follows:

- INDEX COMPONENTS must have a trading history of at least 20 TRADING DAYS.
- INDEX COMPONENTS must have no non-TRADING DAYS.

The determination of the INDEX UNIVERSE is fully rule-based and the INDEX ADMINISTRATOR cannot make any discretionary decisions.

## 2.2. SELECTION OF THE INDEX COMPONENTS

Based on the INDEX UNIVERSE, the initial composition of the INDEX as well as any selection for an ordinary rebalance is determined on the SELECTION DAY in accordance with the following rules (the "**INDEX COMPONENT REQUIREMENTS**"):

In order to become eligible for the SOLACTIVE UNITED STATES 1000 INDEX, SOLACTIVE UNITED STATES 2000 INDEX, and SOLACTIVE UNITED STATES 3000 INDEX, a company needs to fulfill the following additional criteria:

1. Country Assignment: Each security from the INDEX UNIVERSE is assigned to a specific country. If the Country of Primary Listing [CoPL] and the Country of Domicile [CoD] is US, then the security will be assigned to the US. If the CoPL does not equal the CoD, then the Country of Incorporation [Col] and the Country of Risk [CoR] are additionally considered to determine the country assignment. INDEX COMPONENTS must be assigned to the US.
2. Eligible security types: Common Stock, REIT, Tracking Stock
3. New (Current) INDEX COMPONENTS must have a closing price of less than USD 10,000 (15,000).

### 2.2.1. SOLACTIVE UNITED STATES 1000 INDEX

1. Companies in the INDEX UNIVERSE, that fulfill the additional criteria above, are sorted by TOTAL MARKET CAPITALIZATION in descending order. Each company is assigned a rank based on the position in the sorted list, e.g., the company with the highest TOTAL MARKET CAPITALIZATION is assigned rank 1.
2. All companies ranked in the top 850 are selected as INDEX COMPONENTS.
3. Current INDEX COMPONENTS with a rank from 851 to 1,200 are added to the INDEX until the total number of companies in the INDEX reaches 1,000.
4. If the total number of companies is still below 1,000 after the previous steps, the highest-ranking companies are added to the INDEX until 1,000 companies are reached. In case less than 1,000 companies are eligible, all eligible companies are selected, and the INDEX consists of less than 1,000 companies.
5. In case a company has multiple share lines, SOLACTIVE determines a primary share line per company. The primary share line is added to the INDEX. To avoid frequent changes between share lines of a company, SOLACTIVE applies a liquidity buffer rule:
  - > If the company is currently in the INDEX: The primary share line currently included in the INDEX will remain the primary share line if its AVERAGE DAILY VALUE TRADED over the preceding 1-month and 6-month period is at least 75% of any other share line of the company.
  - > If the company is currently not in the INDEX: The share line with the highest AVERAGE DAILY VALUE TRADED over the preceding 1-month and 6-month period is set to be the primary share line.

All other share lines of a company are compared to the 20% (15% if the share line is already an existing INDEX COMPONENT) percentile of the INDEX UNIVERSE respective to the following liquidity parameters:

- > AVERAGE DAILY VALUE TRADED over the preceding 1-month
- > AVERAGE DAILY VALUE TRADED over the preceding 6-month
- > Volume of shares traded over the preceding 1-month period
- > Volume of shares traded over the preceding 6-month period

If a share line exceeds all liquidity thresholds it is added to the INDEX.

## 2.2.2. SOLACTIVE UNITED STATES 2000 INDEX

1. Companies in the INDEX UNIVERSE, that fulfill the additional criteria above and which are not an INDEX COMPONENT of the SOLACTIVE UNITED STATES 1000 INDEX, are sorted by TOTAL MARKET CAPITALIZATION in descending order. Each company is assigned a rank based on the position in the sorted list, e.g., the company with the highest TOTAL MARKET CAPITALIZATION is assigned rank 1.
2. All companies ranked in the top 1,700 are selected as INDEX COMPONENTS.
3. Current INDEX COMPONENTS with a rank from 1,701 to 2,400 are added to the INDEX until the total number of companies in the INDEX reaches 2,000.
4. If the total number of companies is still below 2,000 after the previous steps, the highest-ranking companies are added to the INDEX until 2,000 INDEX COMPONENTS are reached. In case less than 2,000 companies are eligible, all eligible companies are selected, and the INDEX consists of less than 2,000 companies.
5. In case a company has multiple share lines, SOLACTIVE determines a primary share line per company. The primary share line is added to the INDEX. To avoid frequent changes between share lines of a company, SOLACTIVE applies a liquidity buffer rule:
  - > If the company is currently in the INDEX: The primary share line currently included in the INDEX will remain the primary share line if its AVERAGE DAILY VALUE TRADED over the preceding 1-month and 6-month period is at least 75% of any other share line of the company.
  - > If the company is currently not in the INDEX: The share line with the highest AVERAGE DAILY VALUE TRADED over the preceding 1-month and 6-month period is set to be the primary share line.

All other share lines of a company are compared to the 20% (15% if the share line is already an existing INDEX COMPONENT) percentile of the INDEX UNIVERSE respective to the following liquidity parameters:

- > AVERAGE DAILY VALUE TRADED over the preceding 1-month
- > AVERAGE DAILY VALUE TRADED over the preceding 6-month

- > Volume of shares traded over the preceding 1-month period
- > Volume of shares traded over the preceding 6-month period

If a share line exceeds all liquidity thresholds it is added to the INDEX.

### 2.2.3. SOLACTIVE UNITED STATES 3000 INDEX

1. All INDEX COMPONENTS from the SOLACTIVE UNITED STATES 1000 INDEX and the SOLACTIVE UNITED STATES 2000 INDEX are added to the INDEX.

### 2.2.4. SOLACTIVE UNITED STATES 200 INDEX

1. All INDEX COMPONENTS from the SOLACTIVE UNITED STATES 1000 INDEX are sorted by TOTAL MARKET CAPITALIZATION in descending order. Each company is assigned a rank based on the position in the sorted list, e.g., the company with the highest TOTAL MARKET CAPITALIZATION is assigned rank 1.
2. All companies ranked in the top 170 are selected as INDEX COMPONENTS.
3. Current INDEX COMPONENTS with a rank from 171 to 240 are added to the INDEX until the total number of companies in the INDEX reaches 200.
4. If the total number of companies is still below 200 after the previous steps, the highest-ranking companies are added to the INDEX until 200 INDEX COMPONENTS are reached. In case less than 200 companies are eligible, all eligible companies are selected, and the INDEX consists of less than 200 companies.

### 2.2.5. SOLACTIVE UNITED STATES 800 INDEX

1. All INDEX COMPONENTS of the SOLACTIVE UNITED STATES 1000 INDEX, which are not an INDEX COMPONENT of the SOLACTIVE UNITED STATES 200 INDEX, are selected as INDEX COMPONENTS.

### 2.2.6. SOLACTIVE UNITED STATES 2500 INDEX

1. All INDEX COMPONENTS from the SOLACTIVE UNITED STATES 3000 INDEX are sorted by TOTAL MARKET CAPITALIZATION in descending order. Each company is assigned a rank based on the position in the sorted list, e.g., the company with the highest TOTAL MARKET CAPITALIZATION is assigned rank 1.
2. All companies ranked in the top 425 are added to an interim index.
3. Current INDEX COMPONENTS with a rank from 426 to 600 are added to the interim index until the total number of companies in the interim index reaches 500.
4. If the total number of companies in the interim index is still below 500 after the previous steps, the highest-ranking companies are added to the interim index until 500 INDEX COMPONENTS are reached. In case less than 500 companies are eligible, all eligible companies are selected, and the interim index consists of less than 500 companies.
5. All INDEX COMPONENTS of the SOLACTIVE UNITED STATES 3000 INDEX, which are not an INDEX COMPONENT of the interim index, are selected as INDEX COMPONENTS.

The selection of the INDEX COMPONENTS is fully rule-based and the INDEX ADMINISTRATOR cannot make any discretionary decision.

## 2.3. WEIGHTING OF THE INDEX COMPONENTS

On each SELECTION DAY each INDEX COMPONENT is assigned a weight according to FREE FLOAT MARKET CAPITALIZATION.

## 3. REBALANCE

### 3.1. ORDINARY REBALANCE

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1 and 2.2) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

This is carried out by implementing the shares as determined on the FIXING DAY based on the weights calculated on the SELECTION DAY.

For more information on the rebalance procedure please refer to the Equity Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DAY on the SOLACTIVE website under the section "Announcement", which is available at <https://www.solactive.com/news/announcements/>.

### 3.2. EXTRAORDINARY REBALANCE

The INDEX is not rebalanced extraordinarily.

## 4. CALCULATION OF THE INDEX

### 4.1. INDEX FORMULA

The INDICES are calculated as a price return, net total return, gross total return, and adjusted return index.

The calculation is performed according to the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. The divisor index formula stipulates that the level of the INDEX changes based on the change of the prices of its INDEX COMPONENTS taking into account their weight in the INDEX and any currency conversion in case the price of an INDEX COMPONENT is quoted in a currency other than the INDEX CURRENCY.

Any dividends or other distributions are reinvested across the entire basket of INDEX COMPONENTS by means of a divisor at the opening of the effective date (the so-called ex-date) of the payment of such dividend or other distribution.

A more detailed description of the mechanics of the index calculation formula can be found in the Equity Index Methodology under Section 1.2.

For the construction of the adjusted return version a decrement of 50 index points per annum is deducted on each INDEX CALCULATION DAY from the SOLACTIVE UNITED STATES 2000 EUR INDEX TR (ISIN: DE000SLOJ8A7). The decrement will be applied in compliance with the following formula:

If INDEX CALCULATION DAY  $t$  is prior to the START DATE:

$$AR(t) = \left( AR(t+1) + 50 * \frac{ACT(t, t+1)}{365} \right) * \frac{GTR(t)}{GTR(t+1)}$$

Otherwise:

$$AR(t) = AR(t-1) * \frac{GTR(t)}{GTR(t-1)} - 50 * \frac{ACT(t-1, t)}{365}$$

Where:

**$ACT(t-1, t)$ :** The number of calendar days between INDEX CALCULATION DAY  $t$  (included) and INDEX CALCULATION DAY  $t-1$  (excluded)

**$ACT(t, t+1)$ :** The number of calendar days between INDEX CALCULATION DAY  $t+1$  (included) and INDEX CALCULATION DAY  $t$  (excluded)

## 4.2. ACCURACY

The level of the INDEX will be rounded to two decimal places. Divisors will be rounded to six decimal places. TRADING PRICES and foreign exchange rates will be rounded to six decimal places.

## 4.3. ADJUSTMENTS

Under certain circumstances, an adjustment of the INDEX may be necessary between two regular REBALANCE DAYS. Such adjustment has to be made if a corporate action (as specified in Section 4.4 below) in relation of an INDEX COMPONENT occurs. Such adjustment may have to be done in relation to an INDEX COMPONENT and/or may also affect the number of INDEX COMPONENTS and/or the weighting of certain INDEX COMPONENTS and will be made in compliance with the Solactive Equity Index Methodology, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>.

SOLACTIVE will announce the INDEX adjustment giving a notice period of at least two TRADING DAYS (with respect to the affected INDEX COMPONENT) on the SOLACTIVE website under the Section “Announcements”, which is available at <https://www.solactive.com/news/announcements/>. The INDEX adjustments will be implemented on the effective day specified in the respective notice.

## 4.4. CORPORATE ACTIONS

As part of the INDEX maintenance SOLACTIVE will consider various events – also referred to as corporate actions – which result in an adjustment to the INDEX between two regular REBALANCE DAYS. Such events have a material impact on the price, weighting or overall integrity of INDEX COMPONENTS. Therefore, they need to be accounted for in the calculation of the INDEX. Corporate actions will be implemented from the cum-day to the ex-day of the corporate action, so that the adjustment to the INDEX coincides with the occurrence of the price effect of the respective corporate action.

Adjustments to the INDEX to account for corporate actions will be made in compliance with the Equity Index Methodology, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/equity-index-methodology/>. This document contains for each corporate action a brief definition and specifies the relevant adjustment to the INDEX variables.

While SOLACTIVE aims at creating and maintaining its methodology for treatment of corporate actions as generic and transparent as possible and in line with regulatory requirements, it retains the right in accordance with the Equity Index Methodology to deviate from these standard procedures in case of any unusual or complex corporate action or if such a deviation is made to preserve the comparability and representativeness of the INDEX over time.

SOLACTIVE considers following, but not conclusive, list of corporate actions as relevant for INDEX maintenance:

- Cash Distributions (e.g. payment of a dividend)
- Stock distributions (e.g. payment of a dividend in form of additional shares)

- > Stock distributions of another company (e.g. payment of a dividend in form of additional shares of another company (e.g. of a subsidiary))
- > Share splits (company's present shares are divided and therefore multiplied by a given factor)
- > Reverse splits (company's present shares are effectively merged)
- > Capital increases (such as issuing additional shares)
- > Share repurchases (a company offer its shareholders the option to sell their shares to a fixed price)
- > Spin-offs (the company splits its business activities into two or more entities and distributes new equity shares in the created entities to the shareholders of the former entity)
- > Mergers & Acquisitions (transaction in which the ownership of a company (or other business organizations) are transferred or consolidated with other entities, e.g. fusion of two or more separate companies into one entity)
- > Delistings (company's shares are no longer publicly traded at a stock exchange)
- > Nationalization of a company (effective control of a legal entity is taken over by a state)
- > Insolvency

## 4.5. RECALCULATION

SOLACTIVE makes the greatest possible efforts to accurately calculate and maintain its indices. However, errors in the determination process may occur from time to time for variety reasons (internal or external) and therefore, cannot be completely ruled out. SOLACTIVE endeavors to correct all errors that have been identified within a reasonable period of time. The understanding of "a reasonable period of time" as well as the general measures to be taken are generally depending on the underlying and is specified in the Solactive Correction Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/correction-policy/>.

## 4.6. MARKET DISRUPTION

In periods of market stress SOLACTIVE calculates its indices following predefined and exhaustive arrangements as described in the Solactive Disruption Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/disruption-policy/>. Such market stress can arise due to a variety of reasons, but generally results in inaccurate or delayed prices for one or more INDEX COMPONENTS. The determination of the INDEX may be limited or impaired at times of illiquid or fragmented markets and market stress.

## 5. MISCELLANEOUS

### 5.1. DISCRETION

Any discretion which may need to be exercised in relation to the determination of the INDEX (for example the determination of the INDEX UNIVERSE (if applicable), the selection of the INDEX COMPONENTS (if applicable) or any other relevant decisions in relation to the INDEX) shall be made in accordance with strict rules regarding the exercise of discretion or expert judgement.

### 5.2. METHODOLOGY REVIEW

The methodology of the INDEX is subject to regular review, at least annually. In case a need of a change of the methodology has been identified within such review (e.g. if the underlying market or economic reality has changed since the launch of the INDEX, i.e. if the present methodology is based on obsolete assumptions and factors and no longer reflects the reality as accurately, reliably and appropriately as before), such change will be made in accordance with the Solactive Methodology Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

Such change in the methodology will be announced on the SOLACTIVE website under the Section "Announcement", which is available at <https://www.solactive.com/news/announcements/>. The date of the last amendment of this INDEX is contained in this GUIDELINE.

### 5.3. CHANGES IN CALCULATION METHOD

The application by the INDEX ADMINISTRATOR of the method described in this document is final and binding. The INDEX ADMINISTRATOR shall apply the method described above for the composition and calculation of the INDEX. However, it cannot be excluded that the market environment, supervisory, legal and financial or tax reasons may require changes to be made to this method. The INDEX ADMINISTRATOR may also make changes to the terms and conditions of the INDEX and the method applied to calculate the INDEX that it deems to be necessary and desirable in order to prevent obvious or demonstrable error or to remedy, correct or supplement incorrect terms and conditions. The INDEX ADMINISTRATOR is not obliged to provide information on any such modifications or changes. Despite the modifications and changes, the INDEX ADMINISTRATOR will take the appropriate steps to ensure a calculation method is applied that is consistent with the method described above.

## 5.4. TERMINATION

SOLACTIVE makes the greatest possible efforts to ensure the resilience and continued integrity of its indices over time. Where necessary, SOLACTIVE follows a clearly defined and transparent procedure to adapt Index methodologies to changing underlying markets (see Section 5.2 "Methodology Review") in order to maintain continued reliability and comparability of the indices. Nevertheless, if no other options are available the orderly cessation of the INDEX may be indicated. This is usually the case when the underlying market or economic reality, which an index is set to measure or to reflect, changes substantially and in a way not foreseeable at the time of inception of the index, the index rules, and particularly the selection criteria, can no longer be applied coherently or the index is no longer used as the underlying value for financial instruments, investment funds and financial contracts.

SOLACTIVE has established and maintains clear guidelines on how to identify situations in which the cessation of an index is unavoidable, how stakeholders are to be informed and consulted and the procedures to be followed for a termination or the transition to an alternative index. Details are specified in the Solactive Termination Policy, which is incorporated by reference and available on the SOLACTIVE website: <https://www.solactive.com/documents/termination-policy/>.

## 5.5. OVERSIGHT

An oversight committee composed of staff from SOLACTIVE and its subsidiaries (the "**OVERSIGHT COMMITTEE**") is responsible for decisions regarding any amendments to the rules of the INDEX. Any such amendment, which may result in an amendment of the GUIDELINE, must be submitted to the OVERSIGHT COMMITTEE for prior approval and will be made in compliance with the Methodology Policy, which is available on the SOLACTIVE website: <https://www.solactive.com/documents/methodology-policy/>.

## 6. DEFINITIONS

**“AVERAGE DAILY VALUE TRADED”** means, in respect of an INDEX COMPONENT, the sum of DAILY VALUE TRADED over the specified period divided by the number of TRADING DAYS that fall in the specified period.

**“BENCHMARK REGULATION”** shall have the meaning as defined in Section “Introduction”.

**“BMR”** shall have the meaning as defined in Section “Introduction”.

**“CALCULATION DAY”** is every weekday from Monday to Friday. A day on which the New York Stock Exchange or the NASDAQ Stock Exchange are not open for general business is not a CALCULATION DAY.

**“CLOSE OF BUSINESS”** is the calculation time of the closing level of the INDEX as outlined in Section 1.4.

The **“CLOSING PRICE”** in respect of an INDEX COMPONENT and a TRADING DAY is a security's final regular-hours TRADING PRICE published by the EXCHANGE and determined in accordance with the EXCHANGE regulations. If the EXCHANGE has no or has not published a CLOSING PRICE in accordance with the EXCHANGE rules for an INDEX COMPONENT, the last TRADING PRICE will be used.

**“DAILY VALUE TRADED”** means, in respect of an INDEX COMPONENT and a TRADING DAY, the product of (i) the CLOSING PRICE of such INDEX COMPONENT and (ii) the volume traded (measured as a number of shares) of such INDEX COMPONENT on the EXCHANGE during such TRADING DAY.

**“EXCHANGE”** is with respect to the INDEX and every INDEX COMPONENT, the respective exchange where the INDEX COMPONENT has its listing as determined in accordance with the rules in Section 2.

**“FIXING DAY”** is the SELECTION DAY.

The **“FREE FLOAT”** is with regard to each of the securities fulfilling the INDEX COMPONENT REQUIREMENTS on a SELECTION DAY the share class-specific fraction of the total number of shares of such share class issued that are available for trading by market participants and not locked-in by long term holders, as sourced from data vendors.

The **“FREE FLOAT MARKET CAPITALIZATION”** is with regard to each of the securities fulfilling the INDEX COMPONENT REQUIREMENTS on a SELECTION DAY the share class-specific free float market capitalization. It is calculated as the multiplication of the shares outstanding in FREE FLOAT (as sourced from data vendors) with the CLOSING PRICE of the share class as of the respective SELECTION DAY.

**“GUIDELINE”** shall have the meaning as defined in Section “Introduction”.

**“INDEX”** shall have the meaning as defined in Section “Introduction”.

**“INDEX ADMINISTRATOR”** shall have the meaning as defined in Section “Introduction”.

**“INDEX COMPONENT”** is each security reflected in the INDEX.

**“INDEX COMPONENT REQUIREMENTS”** shall have the meaning as defined in Section 2.2.

**“INDEX CURRENCY”** is the currency specified in the column “Currency” in the table in Section 1.2.

**“INDEX UNIVERSE REQUIREMENTS”** shall have the meaning as defined in Section 2.1.

**"INDEX UNIVERSE"** is the sum of all financial instruments which fulfill the INDEX UNIVERSE REQUIREMENTS.

**"LIVE DATE"** shall have the meaning as defined in Section 1.3.

**"OVERSIGHT COMMITTEE"** shall have the meaning as defined in Section 5.5.

**"REBALANCE DAY"** is the first Wednesday in March, June, September, and December. If that day is not a CALCULATION DAY the REBALANCE DAY will be the immediately following CALCULATION DAY.

**"SELECTION DAY"** is 20 weekdays (Monday to Friday) before the scheduled REBALANCE DAY, disregarding any potential change of the REBALANCE DAY.

The **"SHARE CLASS MARKET CAPITALIZATION"** is with regard to each of the securities in the INDEX on a SELECTION DAY the share class-specific market capitalization for any security in the INDEX UNIVERSE. It is calculated as the multiplication of the shares outstanding with the CLOSING PRICE of the share class as of the respective SELECTION DAY.

**"SOLACTIVE"** shall have the meaning as defined in Section "Introduction".

**"START DATE"** shall have the meaning as defined in Section 1.3.

The **"TOTAL MARKET CAPITALIZATION"** is with regard to each of the securities in the INDEX on a SELECTION DAY the sum of all SHARE CLASS MARKET CAPITALIZATIONS of a company.

**"TRADING DAY"** is with respect to an INDEX COMPONENT included in the INDEX at the REBALANCE DAY and every INDEX COMPONENT included in the INDEX at the CALCULATION DAY immediately following the REBALANCE DAY (for clarification: this provision is intended to capture the TRADING DAYS for the securities to be included in the INDEX as new INDEX COMPONENTS with close of trading on the relevant EXCHANGE on the REBALANCE DAY) a day on which the relevant EXCHANGE is open for trading (or a day that would have been such a day if a market disruption had not occurred), excluding days on which trading may be ceased prior to the scheduled EXCHANGE closing time and days on which the EXCHANGE is open for a scheduled shortened period. The INDEX ADMINISTRATOR is ultimately responsible as to whether a certain day is a TRADING DAY.

The **"TRADING PRICE"** in respect of an INDEX COMPONENT and a TRADING DAY is the most recent published price at which the INDEX COMPONENT was traded on the respective EXCHANGE.

**"WM/REFINITIV RATE"** shall have the meaning as defined in Section 1.4.

## 7. HISTORY OF INDEX CHANGES

Version	Date	Description
