# INTRODUCTION

This document (the "GUIDELINE") is to be used as a guideline with regard to the composition, calculation and maintenance of the SOLTI Family (the "INDEX"). Any amendments to the rules made to the GUIDELINE are approved by the OVERSIGHT COMMITTEE as specified in the Bond Index Methodology. The INDEX is owned, calculated, administered and published by Solactive AG ("SOLACTIVE") assuming the role as administrator (the "INDEX ADMINISTRATOR") under the Regulation (EU) 2016/1011 (the "BENCHMARK REGULATION" or "BMR"). The name "Solactive" is trademarked.

The Guideline and the policies and methodology documents referenced herein contain the underlying principles and rules regarding the structure and operation of the INDEX. Solactive does not offer any explicit or tacit guarantee or assurance, neither pertaining to the results from the use of the INDEX nor the level of the INDEX at any certain point in time nor in any other respect. Solactive strives to the best of its ability to ensure the correctness of the calculation. There is no obligation for Solactive – irrespective of possible obligations to issuers of financial instruments or investment funds referencing the INDEX under a valid license – to advise third parties, including investors and/or financial intermediaries, of any errors in the INDEX. The publication of the INDEX by Solactive does not constitute a recommendation for capital investment and does not contain any assurance or opinion of Solactive regarding a possible investment in a financial instrument based on this INDEX.

### 1. INDEX SPECIFICATIONS

# 1.1. SCOPE OF THE INDICES

Solactive US Treasury Inflation-Linked Bond Indices are rules-based, market value weighted indices engineered to measure the performance of Treasury Inflation-Protected Securities (TIPS) issued by the Government of the United States. The indices will be distributed as Total Return Indices (i.e. coupon payments will be reinvested in the index) and a Price Return Index (i.e. coupon payments will not be considered).

#### 1.2. IDENTIFIERS AND PUBLICATION

The INDEX is published under the following identifiers:

Name	ISIN	Currency	Туре	Calculation Formula*	RIC	BBG ticker
Solactive US Treasury Inflation-Linked Bond Index	DE000SLA4B08	USD	TR	Direct	.SOLTI	-
Solactive US Treasury Inflation-Linked Bond PR Index	DE000SLA44R6	USD	PR	Direct	.SOLTIPR	-
Solactive US Treasury Inflation-Linked Bond in CAD TR Index	DE000SLA4577	CAD	TR	Direct	.SOLTICAD	-

Solactive US Treasury						
Inflation-Linked Bond	DE000SLA4585	CAD	CH	Standard	.SOLTICH	SOLTICH
Hedged to CAD TR Index						
Solactive US 5-10 Year						
Treasury Inflation-Linked	DE000SL0DR18	DKK	CH	Standard	.SOLT51DH	-
Bond DKK Hedged Index						
Solactive US 1-20 Year						
Treasury Inflation-Linked	DE000SLA4BZ0	USD	TR	Direct	.SOLTI120	SOLTI120
Bond Index						
Solactive US 5-10 Year						
Treasury Inflation-Linked	DE000SL0DHN6	USD	TR	Direct	.SOLTI510	-
Bond Index						
Solactive US 5-10 Year						
Treasury Inflation-Linked	DE000SL0DHP1	DKK	TR	Direct	.SOLTI51D	-

Solactive US 5-20 Year						
Treasury Inflation-Linked	DE000SL0AZH6	USD	TR	Direct	.SOLTI520	SOLTI520
Bond Index						

<sup>\*</sup>The calculation formula refers to the index calculation's dependency on cash reinvestment, based on whether the cash reinvestment occurs on a daily/direct basis or periodically.

The INDEX is published on the website of the INDEX ADMINISTRATOR (www.solactive.com) and is, in addition, available via the price marketing services of Boerse Stuttgart GmbH and may be distributed to all of its affiliated vendors. Each vendor decides on an individual basis as to whether it will distribute or display the INDEX via its information systems.

Any publication in relation to the INDEX (e.g. notices, amendments to the GUIDELINE) will be available at the website of the INDEX ADMINISTRATOR: <a href="https://www.solactive.com/news/announcements/">https://www.solactive.com/news/announcements/</a>.

#### 1.3. INITIAL LEVEL OF THE INDEX

The initial level of SOLTI on the 10<sup>th</sup> October 2017 (LIVE DATE) is 156.54.

The initial level of SOLTI120 on the 10<sup>th</sup> October 2017 (LIVE DATE) is 154.92.

The initial level of SOLTICAD on the 31st December 2017 (LIVE DATE) is 100.

The initial level of SOLTIPR on the 31st December 2017 (LIVE DATE) is 100.

The initial level of SOLTI510/SOLTI510D on the 13<sup>th</sup> July 2023 (LIVE DATE) is 1000.

The initial level of SOLTI520 on the 11<sup>th</sup> March 2021 (LIVE DATE) is 1000.

Levels of the INDICES published for a period prior to this date have been back-tested. Historical values from the LIVE DATES will be recorded in accordance with Article 8 of the BMR.

<sup>\*</sup>TR means that the INDEX is calculated as Total Return index as described in the Bond Index Methodology, which is available on the SOLACTIVE website: https://www.solactive.com/documents/bond-index-methodology/

<sup>\*</sup>PR means that the INDEX is calculated as Price Return index as described in the Bond Index Methodology, which is available on the Solactive website: <a href="https://www.solactive.com/documents/bond-index-methodology/">https://www.solactive.com/documents/bond-index-methodology/</a>

<sup>\*</sup>CH means that the Index is calculated as Currency Hedge Index, as described in the Currency Hedged Index Methodology, which is available on the SOLACTIVE website: <a href="https://www.solactive.com/documents/currency-hedged-general-methodology/">https://www.solactive.com/documents/currency-hedged-general-methodology/</a>

#### 1.4. PRICES AND CALCULATION FREQUENCY

The Index is calculated and distributed once every Business Day based on the Last Evaluated Bid Price of the Index Components. Bonds added in a rebalancing (see Section 3) are included the Index at the Last Evaluated Bid Price on the relevant Rebalance Day. Bonds which are excluded from the Index in a rebalance are reflected in the calculation of the level of the Index for the Rebalance Day at the Last Evaluated Bid Price on the relevant Rebalance Day. Index analytical values are calculated each Business Day using the Last Evaluated Bid Price based on Fixing Time. Prices of Index Components not listed in the Index Currency are converted using the 4:00 PM London time WM Fixing quoted.

The currency hedged indices are calculated based on Trading Prices on the exchanges on which the Underlying Index Components are listed. Trading Prices of the Underlying Index Components not listed in the Index Currency are converted using the current Intercontinental Exchange (ICE) spot foreign exchange rate. Should there be no current Trading Price for an Index Component, the later of: (i) the most recent Closing Price; or (ii) the last available Trading Price for the preceding Trading Day is used in the calculation.

In addition to the intraday calculation a closing level of the INDEX for each CALCULATION DAY is also calculated. This closing level is based on the CLOSING PRICES for the underlying index and 4:00 PM London WM Spot and Forward Fixings quoted by Reuters. If there is no 4:00 PM London time WM Fixing for the relevant CALCULATION DAY, the last available 4:00 PM London time WM Fixing will be used for the closing level calculation. For SOLTICAD and SOLTICH 4:00 PM New York time WM Fixing will be used.

# 2. INDEX SELECTION

On each Selection Day, all bonds which meet the Index Component Requirements are eligible for inclusion in the Index and will be added as Index Component on the Rebalance Day. Additionally, on each Selection Day, it will be evaluated whether all current Index Components still meet the Index Component Requirements. Each Index Component that does not meet the Index Component Requirements will be removed from the Index on the next Rebalance Day.

#### 2.1. SELECTION OF THE INDEX COMPONENTS

The initial composition of each INDEX, as well as any selection for a rebalance (as specified in Section 3) is determined using the following rules:

- Instruments issued prior to the Selection Day
- Sovereign debt issued by the US government
- Principal and interest must be inflation-linked
- Denominated in USD
- Deducted amount outstanding of at least 750 million USD. The deducted amount outstanding is calculated as the current par amount outstanding (not adjusted for inflation indexation) minus the amount that is held by the Federal Reserve SOMA account (Exception:

only for SOLTI510 and SOLTI51D the SOMA holdings are not deducted from amount outstanding)

- Time to maturity of at least 18 months for new issues entering the index. Remaining time to maturity of at least one year for bonds in the INDEX.
- Fixed-rate nominal coupon
- Exclusion of nominal bonds, non-government INFLATION-LINKED BONDS, STRIPS, Treasury bills, Private placements, floating-rate bonds
- For a bond to be included in the INDEX, a price must be available from the PRICING PROVIDER as determined by the OVERSIGHT COMMITTEE

For Solactive US 1-20 Year Treasury Inflation-Linked Bond Index:

• Time to maturity must be more than 1 year for existing issues (18 months for new issues) and less than or equal to 20 years on each REBALANCING DAY

For Solactive US 5-10 Year Treasury Inflation-Linked Bond Index:

- Time to maturity must be more than 5 years and less than or equal to 10 years on each REBALANCING DAY
- SOMA holdings are not deducted from amount outstanding

For Solactive US 5-20 Year Treasury Inflation-Linked Bond Index:

• Time to maturity must be more than 5 years and less than or equal to 20 years on each REBALANCING DAY

(the "INDEX COMPONENT REQUIREMENTS")]

The determination of the INDEX COMPONENTS is fully rule-based and the INDEX ADMINISTRATOR has no discretion.

#### 2.1.1 SELECTION OF THE INDEX CURRENCY COMPONENTS

Based on the INDEX CURRENCY UNIVERSE, the initial composition of the INDEX as well as any selection for an ordinary rebalance is determined on the Selection Day in accordance with the following rules (the "INDEX CURRENCY COMPONENT REQUIREMENTS"):

• All of the currencies from the INDEX CURRENCY UNIVERSE.

#### 2.2. WEIGHTING OF THE INDEX COMPONENTS

On each Selection Day each Index Component is weighted using the market value based on the Last Evaluated Bid Price and accrued interest as on the Selection Day in order to achieve the aim of the Index.

#### 2.2.1 WEIGHTING OF THE INDEX CURRENCY COMPONENTS

On each Selection Day, the weight of each Index Currency Component is assigned according to the aggregated weights of all the Underlying Index Components quoted in the respective currency.

## 3. ORDINARY REBALANCE

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

For more information on the rebalance procedure please refer to the Bond Index Methodology, which is incorporated by reference and available on the Solactive website: <a href="https://www.solactive.com/documents/bond-index-methodology/">https://www.solactive.com/documents/bond-index-methodology/</a>.

SOLACTIVE will publish any changes made to the INDEX COMPONENTS with sufficient notice before the REBALANCE DAY on the SOLACTIVE webpage.

# 4. CORPORATE ACTIONS

As part of the INDEX maintenance Solactive will consider various events — also referred to as corporate actions — which result in an adjustment to the INDEX between two regular REBALANCE DAYS. Such events have a material impact on the price, weighting or overall integrity of INDEX COMPONENTS. Therefore, they need to be accounted for in the calculation of the INDEX. Adjustments to the INDEX to account for corporate actions will be made in compliance with the Bond Index Methodology.

# 5. **DEFINITIONS**

"BENCHMARK REGULATION" shall have the meaning as defined in Section "Introduction".

"BMR" shall have the meaning as defined in Section "Introduction".

"Business Day" is with respect to the INDEX each day Monday to Friday, except banking holidays as defined by SIFMA US.

"CLOSE OF BUSINESS" is a time stamp when an INDEX is calculated.

"CLOSING PRICE" in respect of an INDEX COMPONENT and a TRADING DAY is a security's final regular-hours TRADING PRICE published by the EXCHANGE and determined in accordance with the EXCHANGE regulations. If the EXCHANGE has no or has not published a CLOSING PRICE in accordance with the EXCHANGE rules for an INDEX COMPONENT, the last TRADING PRICE will be used.

"Currency Hedge Index" represent the return resulting from the sum of an underlying index performance and the performance of the hedge of this index using currency forward contracts.

"GUIDELINE" shall have the meaning as defined in Section "Introduction".

"INDEX" shall have the meaning as defined in Section "Introduction".

"INDEX ADMINISTRATOR" shall have the meaning as defined in Section "Introduction".

"INDEX CALCULATOR" is SOLACTIVE or any other appropriately appointed successor in this function.

"INDEX COMPONENT" is each bond reflected in the INDEX.

"INDEX COMPONENT REQUIREMENTS" shall have the meaning as defined in Section 2.1.

"INDEX CURRENCY" is the currency specified in the column "Currency" in the table in Section 1.2.

"Index Currency Components" is each currency on which Underlying Index Component trades in the market.

"INDEX CURRENCY COMPONENT WEIGHT" is value resultant from the sum of all the UNDERLYING INDEX COMPONENT'S weights quoted in the respective currency.

"INDEX CURRENCY UNIVERSE" is the sum of all currencies which fulfill the INDEX CURRENCY UNIVERSE REQUIREMENTS.

"INDEX CURRENCY UNIVERSE REQUIREMENTS" shall have the meaning as defined in Section 2.1.1

"ISSUER" is the issuing entity of the respective bond.

"OVERSIGHT COMMITTEE" shall have the meaning as defined in the Bond Index Methodology.

"PRICING PROVIDER" is available under https://www.solactive.com/documents/bond-pricing-provider/

"REBALANCE DAY" is the last Business Day of each month for each index in this guideline except for SOLTI520. For SOLTI520, the rebalancing happens quarterly in February, May, August and November at the last business day of the month.

**"SELECTION DAY"** is **6** BUSINESS DAYS before the scheduled REBALANCE DAY, disregarding any potential change of the REBALANCE DAY. For currency hedged indices, the SELECTION DAY is equal to the REBALANCE DAY and rebalancing frequency is monthly.

"SOLACTIVE" shall have the meaning as defined in Section "Introduction".

**"SPOT"** is the spot foreign exchange rate to convert the currency of the INDEX COMPONENT into the denomination of the INDEX CURRENCY.

"TRADING DAY" is with respect to an INDEX COMPONENT included in the INDEX at the REBALANCE DAY and every INDEX COMPONENT included in the INDEX at the CALCULATION DAY immediately following the REBALANCE DAY (for clarification: this provision is intended to capture the Trading Days for the securities to be included in the INDEX as new INDEX COMPONENTS with close of trading on the relevant EXCHANGE on the REBALANCE DAY) a day on which the relevant EXCHANGE is open for trading (or a day that would have been such a day if a market disruption had not occurred), excluding days on which trading may be ceased prior to the scheduled EXCHANGE closing time and days on which the EXCHANGE is open for a scheduled shortened period. The INDEX ADMINISTRATOR is ultimately responsible as to whether a certain day is a Trading Day.

"TRADING PRICES" in respect of an INDEX COMPONENT and a TRADING DAY is the most recent published price at which the INDEX COMPONENT was traded on the respective EXCHANGE.

"Underlying Index Components" is each security reflected in the composition of the Underlying Index.

Please note that the definitions included in the Bond Index Methodology apply to this guideline. In case of a discrepancy, the definition presented in the guidelines should prevail.

# 6. HISTORY OF INDEX CHANGES

Version	Date	Description
1.5	16 November 2020	Corrections
1.6	31 July 2023	Added SOLTI510 and SOLTI51D
1.7	10 August 2023	Clarified that SOLTI510 and SOLTI51D use non-SOMA-adjusted amount outstandings
1.8	18 June 2024	Updated guideline structure and added SOLTI520 and SOLTI51DH

<sup>\*</sup>Versions prior to 1.5 are not considered relevant anymore.
