	> Exclusion of the bottom 60% of companies with the lowest ESG Score (The ESG Score identifies sustainable companies that are better positioned to outperform over the long term, based on the principles of financial materiality. When computing the ESG Score of a company, the algorithm will only use information that significantly helps explain future risk-adjusted performance.).
List of social factors considered	Exclusion of companies with any involvement in the area of controversial weapons (companies manufacturing either whole strategic parts or plat- forms for nuclear weapons, nuclear weapon systems, or nuclear weapon components. Companies involved in chemical and biological weapons man

	 ufacturing, and suppliers involved in providing relevant products or services related to chemical and biological weapons manufacturing. Companies involved in cluster munitions manufacturing and suppliers involved in providing relevant products or services related to cluster munitions manufacturing. Companies involved in land-mines manufacturing, and suppliers involved in providing relevant products or services related to land-mines manufacturing. Companies generating revenues (in proportion to their total revenues) >5% from defense contracting. Exclusion of companies generating revenues (in proportion to their total revenues) >5% in the sector of adult entertainment. Exclusion of companies generating revenues (in proportion to their total revenues) >5% from stem cells research. Exclusion of companies generating revenues (in proportion to their total revenues) >5% production of or >5% from distribution of tobacco products. Exclusion of companies generating revenues (in proportion to their total revenues) >5% from gambling products and/or services. Exclusion of companies generating revenues (in proportion to their total revenues) >5% from gambling products and/or services. Exclusion of companies generating revenues (in proportion to their total revenues) >5% from gambling products and/or services. Exclusion of companies generating revenues (in proportion to their total revenues) >5% from gambling products and/or services. Exclusion of companies generating revenues (in proportion to their total revenues) >5% from gambling products and/or services. Exclusion of companies generating revenues (in proportion to their total revenues) >5% from research and/or production of genetically modified organisms (GMOS).
	Exclusion of the bottom 10% of companies with the lowest Global Compact Score (The S-Ray Global Compact Score quantifies the performance of companies on the principles of the United Nations Global Compact (UNGC), excluding those in breach of Human Rights, Labour Rights, the Environment and Anti-Corruption.).
	> Exclusion of the bottom 60% of companies with the lowest ESG Score (The ESG Score identifies sustainable companies that are better positioned to outperform over the long term, based on the principles of financial materiality. When computing the ESG Score of a company, the algorithm will only use information that significantly helps explain future risk-adjusted performance.).
List of governance factors considered	Exclusion of the bottom 10% of companies with the lowest Global Com- pact Score (The S-Ray Global Compact Score quantifies the performance of companies on the principles of the United Nations Global Compact (UNGC) , excluding those in breach of Human Rights, Labour Rights, the Environ- ment and Anti-Corruption.).
	> Exclusion of the bottom 60% of companies with the lowest ESG Score (The ESG Score identifies sustainable companies that are better positioned to outperform over the long term, based on the principles of financial materiality. When computing the ESG Score of a company, the algorithm will only use information that significantly helps explain future risk-adjusted performance.).

Data and Standards used

Data Input	The data used to construct the index is sourced externally from Arabesque S-Ray GmbH, UK Branch.
Verification and quality of data	The provider of ESG-related data input is selected by the Administrator based on an assessment of its existing processes in order to ensure the reliability and representativeness of the ESG-related data. The data provider has established processes in accordance with accepted and established market standards that ensure the permanent quality and reliability of the ESG-data provided.
Reference standards	International standards referenced by the index methodology are listed in the respective section above.
