

FACTSHEET - AS OF 30-Jun-2025

Solactive ESG Nordic 0-1y Bond NOK TR Index

DESCRIPTION

The Solactive ESG Nordic 0-1y Bond NOK TR Index is designed to track the performance of the short-term Nordic bonds market with eligible issuers operating in accordance with pre-defined ESG screens. The screens are based on established norms such as the United Nations Global Compact and on significant involvement in controversial sectors such as fossil fuel, gambling, and tobacco. The index is calculated as a Total Return Index and is denominated in NOK.

On each selection day, index components are weighted using market value based on the last evaluated bid prices and accrued interest. Three business days before the rebalance day, no issuer may exceed a 5% weight, and any excess is reallocated proportionally. Similarly, sovereign and covered bonds must not exceed 25% weight, with any excess proportionally redistributed among remaining bonds.
